Scan me

Guardare al futuro, oggi più che mai, significa compiere scelte ecosostenibili, a partire dall’impiego di risorse rinnovabili (fotovoltaico) e un utilizzo consapevole dei materiali di uso quotidiano. La Rubinetteria Bugnatese si avvale anche di componenti come aeratori e cartucce tecnologicamente avanzati per il risparmio dell’acqua. Decisa a crescere e migliorare seguendo questa direzione, l’azienda rende oggi disponibile ai suoi clienti la versione digitale del Catalogo scaricabile in PDF tramite codice QR.

WHERE DO WE GO

These last few years have taught us all that talking about eco-sustainability is not just a trend of the moment, a lifestyle or an aesthetic inspiration; it is a very pressing necessity. Looking to the future, today more than ever, means making eco-sustainable choices, starting with the use of renewable resources (photovoltaics) and a conscious usage of daily use materials. Rubinetteria Bugnatese also uses technologically advanced components such as aerators and cartridges for saving water. Determined to grow and improve by following this direction, the Company is now making it available to its customers the digital version of the Catalog downloadable in PDF by QR code.

DOVE ANDIAMO

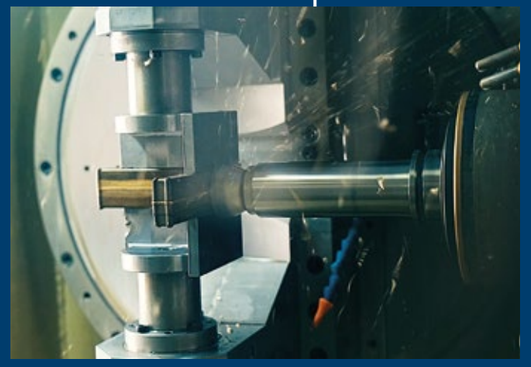

Questi ultimi anni hanno insegnato a tutti noi che parlare di ecosostenibilità non è solo una tendenza del momento, uno stile di vita o un’ispirazione estetica; è una necessità quantomai stringente.

RISPARMIO E RISPETTO
DELL'AMBIENTE

- CONSUMO + BENESSERE

Abitualmente per comodità o per ragioni estetiche la leva di qualsiasi monocomando si tiene in posizione centrale. Quando inizia l'erogazione dell'acqua la si ottiene tiepida anche se non richiesto. Questa operazione fa sprecare energia, perchè permette alla caldaia di accendersi.

Con la cartuccia **ECOSAVE** aprendo il monocomando con la leva in posizione centrale si avrà un'erogazione di sola acqua fredda.

Per ottenere un'erogazione di acqua miscelata è necessario ruotare la leva verso sinistra fino al primo blocco.

Per ottenere un'erogazione di acqua calda è necessario agire sulla leva con maggiore pressione.

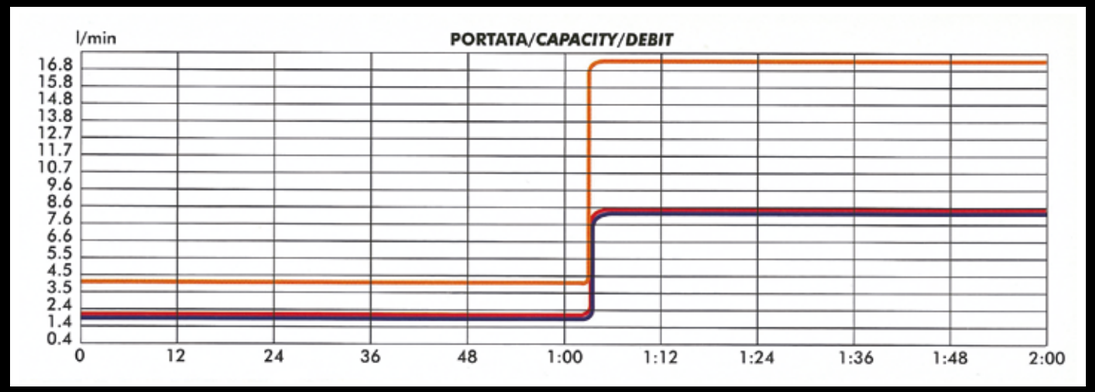

- CONSUMPTION + WELLNESS

Normally for convenience or simply for aesthetical reasons, the lever of any kind of single-control mixer is always maintained in the central position; thus keeping the supply of water tepid even when not required. This operation wastes energy as it enables the boiler to ignite.

Using the **ECO-CARTRIDGE** and opening the single-control mixer with the lever in the central position, you will obtain a supply of cold water only.

In order to obtain a supply of mixed water it is necessary to turn the lever towards the left until it reaches the first locking position.

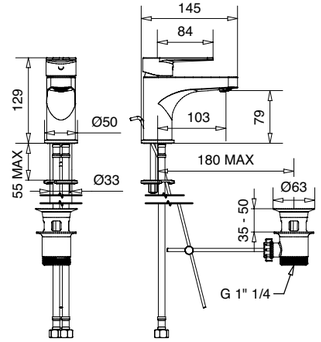

To obtain a supply of hot water it is necessary to apply pressure to the lever.

SISTEMA BREVETTATO

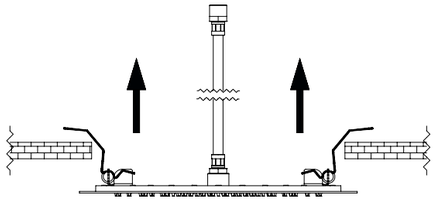

SPRING FIX

Questo sistema unisce due grandi benefici, la riduzione di 1/3 dei tempi di installazione e l'assenza di viti di tiraggio nella parte estetica del prodotto.
Ricavando una semplice sede nel controsoffitto si collega il prodotto. Il sistema Spring-Fix® permette senza l'utilizzo di utensili di fissare il prodotto in pochi secondi.

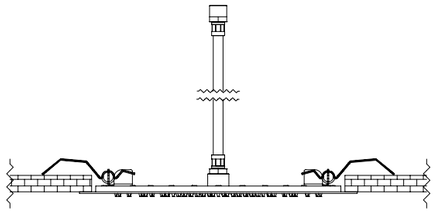

This system combines two great benefits: a 1/3 reduction of the installation time needed and no needs for screws in the aesthetic part of the product. The product is installed by simply creating a sitting site in the false ceiling. The Spring-Fix® system allows for the installation of the system in a few seconds with no tools.
