

RECOMMENDED RETAIL PRICELIST 2024

burgbad

NEW:

10 YEARS WARRANTY*

*register online at www.burgbad.com.

burgbad
stands for
excellent
quality.
Guaranteed.

We provide a **5-year guarantee** from the date of the invoice on your burgbad bathroom furniture. By simply registering online, you can **extend** this guarantee period **to 10 years**. To submit a claim under guarantee, the bathroom furniture must have been installed properly by a qualified sanitary fitter to a solid wall or a wood/metal stud wall.

First climate-neutral bathroom furniture manufacturer in the world

burgbad joined the „Climate Pact of Furniture Manufacturers“ back in 2016 and was the first climate-neutral bathroom furniture manufacturer in the world at the time. Since 2014, we have been working consistently to reduce greenhouse gases (see cover page).

We offset remaining emissions through projects that support climate protection and sustainable development in emerging and developing countries.

Detailed information on the topic of sustainability can be found on our website.

General terms

burgbad is a leading international manufacturer of top-quality bathroom furniture and a successful market player in various areas of the bathroom furniture sector. Independently of which products your customer decides on:

We make solutions with personality, individuality and character for any bathroom – modern, classic or avant-garde – for every taste, need and expectation.

Proven sustainable.

burgbad regularly commissions external testing institutes to perform exacting tests of its products and manufacturing processes. The “Golden M” of the German Furniture Quality Association (DGM) has been providing you with the certainty of certified quality since 1992. All our furniture carry the PEFC Certificate, and are classified as emission class A. In addition, we have geared all the furnishings series of burgbad GmbH in full towards Furniture Made in Germany since 2020.

10 YEARS WARRANTY*

burgbad stands for excellent quality. Guaranteed.

FREE 3D-PLANNING

Efficient and customer-friendly bathroom planning. We produce informative 3D plans according to your specifications.

Request service easily by e-mail:
quotation@burgbad.com

10 YEAR WARRANTY FROM BURGBAD

We provide a 5-year guarantee from the date of the invoice on your burgbad bathroom furniture. By simply registering online, you can extend this guarantee period by a further five years to 10 years. To submit a claim under guarantee, the bathroom furniture must have been installed properly by a qualified sanitary fitter to a solid wall or a wood/metal stud wall and the furniture must have been used as intended in the non-commercial sector. Showroom items, wear parts and damage caused by force or improper handling or fitting are excluded. Statutory guarantee rights still continue to apply. Please refer to the warranty certificate for further information.

Just register online:
<https://burgbad.de/en/service/guarantee/>

3D-PLANNING-FREE OF CHARGE SERVICE

As a member of the „Arbeitsgemeinschaft Neue Medien der deutschen Sanitärindustrie e.V.“, burgbad provides computer-aided plans, quotation data and product images free of charge. The 3D bathroom plans are created individually; a sketch with details of the range, colour and handle options and dimensions is all that is required. The burgbad office and field service team is always on hand to provide help and advice. If you involve us early on in the planning phase for customised products, we can plan and produce the optimum solution for your bathroom together.

FITTING MATERIAL

Matching mounting rails are coming with delivery. Below 300 mm width hooks are delivered. Washbasin fixation not included in delivery.

MOUNTING INSTRUCTIONS

Detailed mounting instructions can be found under www.burgbad.com, are included with the furniture or can be scanned on the packaging via QR-code.

WASHBASINS

The following production tolerances apply for all mineral cast, HPL and glass washbasins in relation to flatness: 0.2% of length / depth per side. The production tolerances for length differ as follows for standard fixed lengths, customised sizes and recess built-ins: Fix dimension: 0,3% / -0,1% related to nominal dimension
Flexible dimension: +3/+6 mm
Niche: +0/-3 mm
Mineral cast washbasins to be installed in a niche should be 5 mm smaller than the niche (approx. 2.5 mm shorter on left- and right-hand sides).

All mineral cast washbasins are fitted with a tap hole as standard. These can also be ordered without a tap hole at no extra charge and with several tap holes, with the exact position specified, for an extra charge. (Except for the sys10 series)

Water temperature should not exceed 65°C.

The dimensional tolerance for ceramic washbasins is +/-0.8% Depending on the type, ceramic washbasins can be ordered with several tap holes for an additional charge. Please note the information on the relevant page.

VANITY UNITS

All vanity units are anthracite grey on the bottom, back and inside of the units.

DOOR DAMPER SYSTEM

burgbad relies on innovation. Only first class suppliers meet our high demands. An innovative door damping system with an ingenious mechanism ensures almost silent door closing by closing slowly. The door damper automatically adapts its closing speed. Softly and quietly, the door closes gently providing even more comfort.

METAL DRAWERS AND PULL-OUTS

burgbad stands for quality, durability, functionality: The metal drawer boxes extend fully and are equipped with a noiseless self-close mechanism, including dampers – the „silent system“ that ensures they close completely silently. Six steel ball bearings in the runners ensure that they run smoothly, absolutely straight and precisely. Integrated locking mechanism. The metal drawer boxes used are extremely durable and have a high load capacity (up to 30kg including the weight of the drawer/drawer box). Thanks to a click mechanism, the drawers and drawer boxes are easy to remove for cleaning. Simply guide the drawer box carefully back onto the runners; once it is in position, push it back until the lock clicks into place, done!

FEATURES

The electronic description of our furniture consists of tested parts and complies with the requirements in the CE directives.

COLOURS AND FINISHES

Wood is a natural product. Colour variations and differences in the structure of real wood veneer can appear despite our most careful workmanship. This is not a fault with the product, rather the difference in structure, grain, colour etc add to the beauty of the furniture. It is not possible to guarantee a continuous grain pattern across door and drawer fronts.

Fronts, carcasses and boards are made from different materials (e.g. thermoform foil, melamine, laminate etc.) and this can also create shade and colour differences.

Furniture is manufactured and delivered based on individual orders, therefore it is not possible to accept returns unless the item is faulty. PVC foil is used for thermoform fronts depending on the surface design because of the special properties. Furniture is manufactured, put together and delivered on order. Therefore it is not possible to take it back. The right to make changes in design, execution, material colour are reserved. burgbad assumes no liability for improper assembly of furniture, mirrors and washbasins.

errors and omissions excepted. Colours may vary due to printing process.

ORDERING INFORMATION

Please supply the following information with your order

Product range: Badu
Front: White matt no. F3689
Handle: long line handle, anthracite, G0196
Typ-no: SFUV062
Hinged: L
Washbasin colour: white gloss no. C0001

GERNEAL

NEU

NEW

New product available now.

IMPORTANT INFORMATION

Please pay attention to additional information with marked products.

INCLUDED

LED- TEMPERATURE ADJUSTMENT

The LED-lighting may be individually adjusted from cold to warm white.

LIGHT TO DIM

LED lighting can be varied in intensity.

LED-ILLUMINATION OF WASHBASIN

Mirror cabinets / mirrors incl. LED-illumination of washbasin.

LED-LIGHTING OF VANITY UNIT

LED-lighting between washbasin and vanity unit.

ELECTRICAL COMPONENTS

The electrical components in these products are already mounted. If necessary, they can be dismantled and replaced

CONNECTION TO ROOM LIGHT INCLUSIVE

Connection to room light inclusive or possible without surcharge.

BURGBAD CLEANFLOW

Washbasin with innovative siphon incl. cover
Standard: Drain valve, optional: allows water to accumulate in the basin.
From 1 April 2024, all sys20, sys30 and rc40 Solitaire mineral cast washbasins will be switched to burgbad cleanFlow.

WASTE AND OVERFLOW SYSTEM

Washbasin including concealed drain and overflow system, lockable

WASTE OUTLET

Washbasin incl. waste outlet. Waste outlet can not be closed.

PUSH TO OPEN SYSTEM

Washbasin incl. push to open waste system.

SPECIAL SIPHON

Special siphon included in delivery.

ROCKSOLID

Mineral cast washbasins with totally robust surface.

DIRT RESISTANT SURFACE

The smooth surface allows water and dirt to run-off easily and is easy to maintain and clean.

ULTRA DIRT RESISTANT SURFACE

The porefree surface with maximum brilliance allows water and dirt to run-off making cleaning and maintenance extremely easy.

TIP ON-TECHNIC

Handle less opening and soft self closing with new mechanical solution.

ANTI-FINGERPRINT COATING

The soft matt surface disguises fingerprints.

POSSIBLE

RAL COLOURS

RAL colours possible for a surcharge, see sample calculation on page 9.

DIVIDER

See accessories, please order separately.

FRONT/CARCASS COLOUR OPTIONS

A different body colour than the front colour can be selected; within the price group. Additional charge SOAS999, see page: 7

TAP HOLES

Information about mixers.

RAL COLOURS

High gloss or matt lacquered fronts possible in RAL colours.

The price is based on the following:

- Item price in the relevant price group (matt or high gloss)
- + 25% surcharge on the item price

Process:

1. Please specify the exact RAL or NCS code on the order.
2. You will receive an approval sample within 2 weeks of ordering.
3. You then issue your written approval.
4. Once the sample's approved, the furniture will be delivered in the standard lead time.

Please note:

The colours in the RAL or NCS range equal burgbad's matte level of glossiness. Where high gloss is concerned, the colour varies because the light refraction is different.

Metallic colours are not possible.

Not possible for Eqjo, glass countertops and washbasins.

	DESCRIPTION	REF.NO	WATT	WIDTH	PRICE
Washbasin colour	Included	Material			
	 	Ceramics - are industrially produced of high-quality porcelain raw materials: kaolin, clay feldspat and quartz. When firing temperatures reach approximately 1,250°C, the ceramic body creates a lasting compound with the glaze that gives the product a high mechanical consistency and a cohesive glass surface.

COOL AND PRACTICAL

With Fiumo, dreams of a refreshing bath quickly get flowing. The name of the sys10 line Fiumo is derived from „Fiume“ (Italian: flow, stream) and alludes to the special lines of the washbasins. Fiumo is reduced in design, easy to handle in planning and versatile in its look and feel.

PRODUCT FEATURES

- delivery time: **2 - 4 days ex works**
- Front soft matt ice blue and graphite with anti-fingerprint coating 
- Bicolour: Doors and drawers can be chosen in a different colour
- Guest bath
- pleat-effect front with 3D Structure
- front: Thermoformed
- Long line handle: White matt, black matt, chrome

FLAWLESS DESIGN

The style of the b:me series is defined by soft edges and gentle lines. The natural basic shape is the recurrent theme that connects all the modules with one another. The lines of the vanity cabinets follow the contours of the washbasin and the "waist" between the two makes the furniture particularly easy to care for.

PRODUCT FEATURES

- Delivery time: **6 - 8 weeks ex works**
- Bicolour: Mid-height cabinets can be combined to create a bicolour tall cabinet.

Washbasin only available with 1 mixer hole. Without tap hole: no no surcharge.

CURVACEOUS ELEGANCE

This is a good start to the day right in the bathroom: A new washbasin solution presents itself elegantly and curvaceously. The washbasin made of mineral cast is a real palm stone. Despite its hardness, the mineral cast can be wonderfully converted into soft shapes. Badu knows how to inspire with its visual lightness and finely curved flat rim.

PRODUCT FEATURES

- Delivery time: **4 - 6 weeks ex works**
- Bicolour: Shelf back panels and arched fronts can be chosen in a different colour: White, platinum, bronze

Washbasin colour	Included	Material			
		Ceramics - are industrially produced of high-quality porcelain raw materials: kaolin, clay feldspat and quartz. When firing temperatures reach approximately 1,250°C, the ceramic body creates a lasting compound with the glaze that gives the product a high mechanical consistency and a cohesive glass surface.

CERAMIC WASHBASIN INCL. VANITY UNIT

Washbasin colour

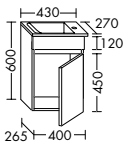

White No. C0001

Included

Material

Ceramics - are industrially produced of high-quality porcelain raw materials: kaolin, clay feldspat and quartz. When firing temperatures reach approximately 1,250°C, the ceramic body creates a lasting compound with the glaze that gives the product a high mechanical consistency and a cohesive glass surface.

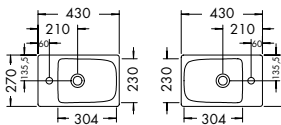

- ceramic washbasin**

CLEAN LINES IN THE MOST BEAUTIFUL CONSEQUENCE

Can clarity be sensuous? Yes! Through generous surfaces that flow in the space like a fabric and seamlessly create more planes. And through an exciting play of warm, soft colours, pure white and wooden surfaces, which Yumo combines with transparent smoked glass elements - for attractive views and insights. For a completely new vitality in bathroom spaces.

----------------	--	-----	--------	--------------	--------------

burgbad cleanFlow: allows water to accumulate in the basin **FLOA080 cover**. See page: 153. Please order separately.

Room switches and electrical equipment can be altered to make them suitable for use in your country. Surcharge SOAS999: **219,-**, infos see page: 7.

INNOVATIVE TRAP: MORE HYGIENE FOR THE BATHROOM

Unpleasant smells coming from the trap or overflow? Or even a blocked drain?

So far, it's been impossible to completely prevent such problems because conventional space-saving traps have large, inaccessible areas that can't be cleaned. Over time, biofilms build up there – a breeding ground for bacteria, germs and viruses which then cause unpleasant smells.

INTELLIGENT OVERFLOW PROTECTION FOR ANY WASHBASIN

The new trap comes with a patented stopper that replaces the overflow hole. As a result, concealed cavities are no longer required. The stopper is designed so that the water drains automatically before the washbasin can overflow. The added bonus of this innovation: the clever overflow protection is suitable for countertop basins as well.

THE STOPPER burgbad cleanflow+:
 – safe and controlled filling
 – suitable for countertop basins as well

But that's not all: : the water that flows into the basin from the tap creates aerosols that can contribute to the transmission of harmful organisms. And if the trap gets blocked as well, it's hard to enjoy even the most beautiful bathroom. Although chemical drain cleaners usually do the trick fast, they pollute the wastewater and therefore the environment too. In Germany alone, approx. 20,000 tonnes are used every year.

Thanks to the innovative new trap burgbad cleanflow, plungers, citrus or chemical drain cleaners will be largely obsolete in the bathroom in future.

Because the water seal in the trap is only approx. 2cm under the valve ring, it can be cleaned effortlessly at any time, preventing biofilms and unpleasant smells in next to no time.

THE MOST IMPORTANT BENEFITS OF BURGBAD CLEANFLOW:

geruchsfrei

eliminates blockages

easy to clean

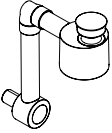

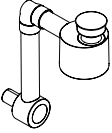

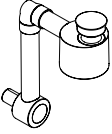

space-saving

BURGBAD CLEANFLOW + STOPPER: MORE HYGIENIC, SAFER, SPACE-SAVING

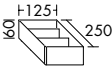

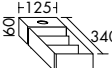

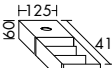

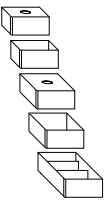

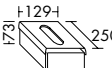

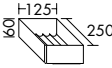

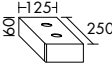

The short distance the water drops before reaching the trap (2cm instead of 25 – 60cm) means fewer aerosols are produced. And because the new trap doesn't have any crosspieces or edges, blockages are largely eliminated. It also results in up to 30% more space in the upper pullout.

600 (width)

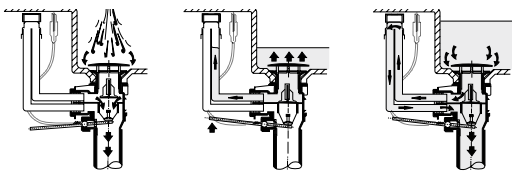

A

ABS thick edges - (ABS = Acrylonitrile Butadiene Styrene) - ABS thick edges are 1, 2 or 4 mm thick. By applying these thick edges, rounding of the edges with radii from 2-4 mm can be achieved

C

Ceramics - are industrially produced of high-quality porcelain raw materials: kaolin, clay feldspart and quartz. When firing temperatures reach approximately 1,250°C, the ceramic body creates a lasting compound with the glaze that gives the product a high mechanical consistency and a cohesive glass surface.

„Clou“ - The drainage and overflow system by Geberit without a visible overflow opening is supplied with the mineral cast washbasins with vanity tops. A plastic tube divided in two parallel chambers is hidden behind the washbasin, directly under the top edge of the possible water level. If the maximum water level in the washbasin is reached, the overflowing water drains out through the two tube chamber.

H

HPL panels - (high pressure laminate panels) The HPL panel is often referred to as Resopal®; is made of a phenolic resin core with a thickness of 0.6 to 1 mm. This core is treated with a one - two melamine resin laminate panels. Adding another overlay increases the maximum abrasion resistance for this panel. HPL is mainly used for cover plates and vanity units, but also for high-quality fronts.

M

M Seal of Quality - The burgbad bathroom furniture has been awarded with the seal of quality by Möbel e.V. (Registered Association of Furniture Manufacturers). The Gütegemeinschaft Möbel is a federation of furniture manufacturers and suppliers whose products are tested by an independent testing facility, the Landesgewerbeanstalt (State Trade Agency).

MDF - (medium density fiberboard) - The medium density fiberboard (MDF) is made of wood fiber that are produced in a mechanical and chemical manner. The particularly fine surface of the MDF is perfect for secondary processing. The edges can be contoured and lacquered.

Melamine panels - Melamine panels are particle boards that are treated with a melamine paper (impregnated with 80 to 140g of melamine resin) The lamination has an insoluble bond with the particle board by using a melamine coating, high pressure and heat. The surface structure (matte, glossy, porous structure, pearl structure etc.) is determined by the type of pressing plates. The colouring is determined by printing.

Mineral cast - The basic material of mineral cast products is a composite material made of natural stone powder and polyester resin as a adhesive agent. The surface consists of a high-gloss polyester lacquer. The advantage of the material is that it is easy to clean and if damage should occur, it can be repaired.

Miter cut - The corner connection of two components that are cut at an angle and the joined is known as a mitre cut. The advantage of a miter cut is the greater contact or connection surface. This increases the stability of the components. Furthermore, the butt joints of both pieces meet at an edge and is therefore less noticeable.

P

Particle board (E1) - Particle boards are among the most important basic materials of modern furniture manufacturing. To produce particle boards, pieces of waste are not used; only specially chipped natural wood, primarily spruce, pine and beech are processed.

Particle boards are divided into emission categories E1, E2 and E3. The classification of the boards depends on their formaldehyde emissions. For the E1 particle board, the formaldehyde evaporation may have a maximum 0.1 mg/ m³. The E1 particle board with this emission category does not pose a health hazard.

PUR lacquer (Polyurethane lacquer) - Today only 2-component PUR lacquers are used to paint bathroom furniture fronts. Polyurethane lacquers are among the reaction lacquers; that means, they harden by using chemical reactions. PUR lacquers are particularly hard, abrasion resistant and repel water, oils and chemicals. After gelation, the material is then polished. The thorough hardening procedure takes place during this secondary processing.

S

Solid wood, solid wood edges - Solid wood is the most elegant and most expensive variant in the construction of furniture. Solid wood edges are also partly used for furniture made of veneers.

T

Thermoform front (Thermoforming) - MDFs are used as the backing material for thermoform fronts. The backing material is first milled exactly to the format and contoured all the way around. Contouring the surfaces is also possible. In the so called membrane pressing procedure, the three-dimensional components are contoured, then coated with a thermoplastic foil using an adhesive and pressure, heat and vacuum techniques are also applied. During this process, it is possible to completely coat the entire surface and all four narrow sides of the front.

V

Veneer and veneer edges - Veneer is referred to as 0.5 - 2.5 mm thick layers of wood which can be produced using various slicing techniques. Furniture with wood veneers are covered on the edges either only with veneers are covered on the edges either only with veneer or with solid wood edges. Normal veneer edges are used for this with a thickness of 0.6 mm or veneer edges with up to 3 mm thickness according to the radius of the front. The veneer edges are surface-treated along with the veneer surface, that is to say polished, stained, glazed and lacquered.

GENERAL DELIVERY AND PAYMENT TERMS

1. General information

1.1. These General Terms and Conditions apply exclusively to the entire business relationship between burgbad and the buyer. Subject to change, these shall also apply to future business relationships between burgbad and the buyer even if not explicitly included again. Other terms and conditions of purchase or other general terms and conditions of the buyer are expressly excluded. These General Terms and Conditions shall also apply exclusively if burgbad carries out the delivery to the buyer without reservation in the knowledge of conflicting or deviating business relationships of the buyer.

1.2. If a framework agreement exists between the buyer and burgbad, these General Terms and Conditions apply both to the framework agreement and to the individual order.

1.3. These General Terms and Conditions do not apply to consumers within the meaning of section 13 of the German Civil Code (BGB).

2. Order

2.1. Offers from burgbad are subject to change and, unless the circumstances indicate otherwise, are merely an invitation to the buyer to submit concrete, definitive contractual offers to burgbad („invitatio ad offerendum“). If burgbad provides the buyer with drawings or technical documents for an offered technical purchase item, these remain the property of burgbad.

2.2. burgbad is entitled to accept contract offers from the buyer, e.g. in the form of orders, within 14 days. During this time the buyer is bound to its contractual declaration.

3. Prices, payment terms

3.1. The prices are net prices plus the statutory value added tax applicable at the time. The prices do not include customs, insurance and other costs.

3.2. Invoices are due for payment immediately and without deduction, unless other special agreements have been made. burgbad is entitled to demand advance payments or securities at the expense of the buyer upon conclusion of the contract.

3.3. If the buyer is in default of payment, burgbad shall be entitled to demand default interest in the amount of 9 percentage points above the applicable base interest rate. We reserve the right to assert a claim for any further concrete damage caused by default.

3.4. The statutory periods of limitation apply.

4. Delivery dates

4.1. Unless otherwise stated, delivery times are approximate. Compliance with burgbad's delivery obligations presupposes the timely and proper fulfilment of the buyer's obligations. This means, in particular, that the buyer shall ensure the acceptance of the ordered goods at the delivery address indicated by him/her.

4.2. burgbad is entitled to make partial deliveries and provide partial services if these are reasonable on acceptance, taking into account the situation of burgbad and the buyer's legitimate interests, in particular if the deviation is within the scope of customary commercial tolerances or if the respective delivery items are different, unrelated delivery items.

4.3. In the event of delays in delivery due to the occurrence of unforeseen events for which burgbad is not responsible, in particular operational disruptions, official measures, non-delivery to burgbad or force majeure, any delivery periods shall be extended by the duration of the hindrance. Force majeure shall also apply in particular in the event of industrial action, including strikes and lawful lockouts in the operations of burgbad or at burgbad's suppliers. In these cases, claims for damages by the buyer are excluded, except in cases of intent and gross negligence.

4.4. If the buyer is in default of acceptance or is responsible for a delay in the dispatch of the goods, a storage fee of 5.00 EUR net per loading metre and working day will be charged. 1 loading metre corresponds to 5.7 cubic metres. The right of the buyer to prove, in individual cases, that burgbad has not incurred any damage, or considerably less damage, as a result of the default of acceptance concerned remains unaffected by this. The other rights of burgbad, in particular to withdrawal from the purchase contract, also remain unaffected.

5. Assumption of risk, duty to give notice of defects and duty to examine

5.1. The risk is transferred to the buyer as soon as the item has been delivered to the forwarding agent, the carrier or the person or institution otherwise designated to carry out the shipment, even if partial deliveries are made or burgbad has assumed other services, e.g. the shipping costs.

5.2. Express reference is made to the provisions of sections 377, 378 of the German Commercial Code (HGB).

6. Retention of title

6.1. burgbad retains ownership of the delivery item until all payments from the delivery contract have been received. If the buyer acts in breach of contract, in particular in the event of default in payment, as well as in the event of an application for the opening of insolvency proceedings, burgbad shall be entitled to take back the delivery item and the buyer shall be obligated to surrender it. In the event of seizures or other interventions by third parties, the buyer shall inform burgbad immediately in writing.

6.2. The buyer is entitled to resell the delivery item in the ordinary course of business. However, he/she hereby assigns all claims to burgbad which accrue to him/her from the resale against the buyer or against third parties, irrespective of whether the reserved goods are resold without or after processing. The buyer is authorised to collect these claims even after the assignment. The authorisation of burgbad to collect the claims itself remains unaffected by this; however, burgbad agrees not to collect the claims as long as the buyer properly fulfils his/her payment obligations. burgbad may demand that the buyer informs it of the assigned claims and their debtors, provides all the information necessary for collection, hands over the relevant documents and informs the debtors of the assignment. If the delivery item is resold together with other goods which do not belong to burgbad, the buyer's claim against the collector is deemed to be assigned in the amount of the delivery price agreed between burgbad and the buyer.

6.3. burgbad is entitled to demand appropriate securities for the proper fulfilment of the buyer's obligations. burgbad undertakes to release the securities to which it is entitled insofar as their value exceeds the unsettled claims to be secured by more than 10%.

7. Warranty, compensation

7.1. The statutory warranty period of two years from the transfer of risk applies to new goods. The warranty period for exhibition goods is one year from the transfer of risk.

7.2. Obvious transport damage must be reported to burgbad immediately after receipt of the goods. The buyer shall arrange the necessary formalities with the carrier and, in particular, make all necessary arrangements to safeguard rights of recourse against third parties.

7.3. burgbad shall only be liable for damage which burgbad or its vicarious agents have caused intentionally or through gross negligence. In the case of simple negligence, burgbad shall only be liable in the event of injury to life, body or health and in the event of breach of cardinal duties. A cardinal duty is the obligation whose fulfilment is essential for the proper performance of the contract and on compliance with which the buyer regularly relies or may rely.

7.4. If burgbad is liable for breaches of duty which are based on simple negligence, burgbad's liability is limited to the amount of damages which are typical for contracts of the type in question and which were foreseeable at the time of the conclusion of the contract, or at the latest when the breach of duty was committed. This shall not apply in the event of injury to life, body or health.

7.5. Claims for damages, which do not presuppose fault by law, remain unaffected by this.

8. Obligation to perform, impossibility

8.1. If the entire performance becomes impossible for burgbad before the transfer of risk as a result of a circumstance for which burgbad is responsible, the purchaser may withdraw from the contract. In the event of partial impossibility or partial inability to perform, the above provision shall only apply to the corresponding part. In this case, the buyer may only withdraw from the entire contract if he/she can prove a justified interest in refusing a partial delivery. Further claims of the buyer, in particular claims for damages, are excluded in accordance with the provisions of section 7.

8.2. If the impossibility occurs during default of acceptance or through the fault of the buyer, the buyer remains required to fulfil the contract.

9. Applicable law, legal venue

9.1. The law of the Federal Republic of Germany shall apply to all legal relationships between burgbad and the buyer arising from or in connection with the business relationship established between burgbad and the buyer, excluding the UN Convention on Contracts for the International Sale of Goods.

9.2. If the buyer is a merchant, a legal entity under public law or a special fund under public law and no exclusive legal venue is established, the registered office of burgbad is the place of fulfilment and legal venue for all legal disputes.
