

A photograph of a bathroom sink area. On the left, a stack of white and dark towels is visible. In the center, a tall, slender glass stands on a dark surface. To the right, a white ceramic sink with a chrome faucet is partially shown. The background features a wall with a black and white floral pattern. The word "Retro" is written in a large, yellow, cursive font across the center of the image.

KERASAN

- 1- Posizionare i montanti "A" già preforati a parete, come da disegno, ed assicurarsi che siano perfettamente in bolla (fig.1)
- 2- Segnare con una matita i due punti (alto e in basso all'interno del profilo) accertandosi di aver marcato il muro (fig.2).

1-Position the pre-holed posts "A" to the wall, as shown in the drawing, and make sure they are perfectly leveled (fig.1).

2- Mark the two points with a pencil (at the top, at the bottom inside the profile), making sure you've marked the wall (fig. 2).

N.B. per assicurare un buon deflusso dell'acqua all'interno del piatto doccia, raccomandiamo di posizionare il box doccia il più perimetrale possibile verso l'interno.

PLEASE NOTE:
to ensure proper outflow of the water inside the shower tray, we recommend that you position the stall shower as much as possible in a perimeter position, toward the inside.

Consigli per la pulizia :

Trattandosi di alluminio cromato o dorato o bronzo , a seconda delle finiture, prestare molta attenzione in fase di montaggio.
Per la quotidiana pulizia usare esclusivamente pelle di daino o similari, bagnato con acqua e ben strizzato e asciugare subito dopo con panno morbido, astenersi dall'usare qualsiasi detersivo o prodotto chimico ne tanto meno spugnette o panni abrasivi/ruvidi. L'articolo in questione, per le sue peculiarità costruttive, non necessita di ulteriore protezione e ne di lucidanti.
Per la pulizia del vetro del box doccia adoperare detersivi idonei per la pulizia di vetri e cristalli non adoperare detersivi cremosi abrasivi ne spugnette abrasive.

- 3-Forare il muro in corrispondenza dei segni, tenendo conto del diametro degli stop di fissaggio in dotazione (fig. 3).
- 4- Inserire gli stop nei fori del muro accostare il profilo ed avvitare, prima di tirare del tutto le viti degli stop è consigliabile, tra il profilo ed il muro, sigillare con un filo di silicone, idoneo per box doccia (antimuffa, non acetico trasparente)(fig. 4)
- 5- Avvitare fino a bloccare i montanti alla parete.
E' consigliabile, nel mettere il silicone, un filo al centro del montante così da non farlo fuoriuscire.

3-Drill holes in the wall in correspondence of the marks, bearing in mind the diameter of the supplied fastening stops (fig. 3).

4-Insert the stops in the holes in wall, move the profile near, and screw it, before pulling the screws of the stops all the way, it is advisable to seal the space between the profile and the wall with a "thread" of silicon, suitable for the stall shower (anti-mold, non-acetic, transparent) (fig. 4).

5-Screw until the posts are locked to the wall.
When applying the silicon, it is advisable to apply a thread at the center of the post, so that it doesn't leak out.

Cleaning tips:

Since you are dealing with chromed aluminum or gold-plated or bronze depending on the finishes, pay much attention during the assembly phase.
Use deerskin or a similar product only for your everyday cleaning, wet with water and tightly squeezed, and immediately after dry with a soft cloth, absolutely avoid using any type of detergent or chemical product, nor either sponges or abrasive/rough cloths.
Due to its constructional peculiarities, the article at hand does not require any further protection nor the application of polishes.
To clean the glass of the stall shower use detergents suitable to clean glass and crystal.
Do not use abrasive cream detergents nor abrasive sponges.

- 7-Infilare il pannello con il vetro (parete fissa della doccia), nel profilo "A" precedentemente fissato a parete, aspettare prima di bloccarlo con le viti autoflettanti in dotazione, bloccarlo solo nella parte alta con "il tappo" di raccordo tra profilo e pannello .
Prima di fare ciò, tra il bordo del piatto doccia e il pannello del box doccia, sigillare con del silicone antimuffa non acetico trasparente (fig.5).
Bloccare con apposita staffa, solo a muro(fig.7), sul pannello bloccare a fine montaggio, avvalendosi di una squadra per posizionare il pannello a 90 gradi con la parete

7-Insert the panel with the glass (fixed wall of the shower) in the profile "A" previously fastened to the wall; wait before locking it with the supplied self-threading screws; only lock it in the part with the "cap" interconnecting the profiles .

Before doing the above, seal the space between the edge of the shower tray and the stall-shower panel with anti-mold, non-acetic, transparent silicon (fig. 5). Lock with the specific clamp against the wall only (fig. 7), lock on to the panel after assembly has been completed, using a square to position the panel at a 90° angle with respect to the wall.

- 8-Infilare il pannello con l'anta vetro "Y", nel profilo "A" precedentemente fissato a parete.
Regolare l'anta "Y", in modo che combaci perfettamente con il profilo verticale calamitato del pannello fisso "X" avvalendosi di una squadra (fig. 7).
Ora avvitare con le apposite viti autoflettanti sia il pannello "X" che il pannello "Y", fino a bloccare porta e lato fisso ai relativi montanti (fig.6) coprire le viti con i relativi tappini e bloccare il pannello fisso con la staffa già posizionata in alto (fig. 8).

8-Insert the panel with the glass door "Y" in the profile "A" previously fastened to the wall.

Adjust the door "Y" so that it matches perfectly with the vertical magnetic profile of the fixed panel "X", using a square (fig. 7).
Now, with the specific self-threading screws, screw both panel "X" and panel "Y", until you've locked the door and fixed side to the relative posts (fig. 6), cover the screws with their relative caps, and lock the fixed panel with the bracket already positioned at the top (fig. 8).

The WARRANTY is valid provided that the following conditions are met:

- State-of-the-art installation, with walls, shower tray, squared walls and leveled pavement.
- The product has been inspected before starting to install.
- Maintenance and cleaning of the product are carried out in accordance with the instructions reported in the notes.
- It has been ascertained that the installation, in the way it has been carried out, does not present water leakages.

The WARRANTY is not valid in the following circumstances:

- Failure to follow the instructions supplied by the manufacturer.
- Accidental breakage of the glass.
- Changes and customizations made by the installer/user.
- Standard wear-out of the product.

Le fasi di montaggio possono essere, a grandi linee, applicate a tutte le tipologie dei box doccia retrò

The above assembly steps can on a whole be applied on all the types of Retrò stall showers
