La solidità dei materiali

Stella è l'unico produttore che, per le parti da incasso a diretto contatto con i muri, privilegia il bronzo all'ottone. Nessun danno da fenomeni elettrici, chimici o meccanici: lo dimostra l'eccezionale stato di conservazione dei sistemi idraulici in bronzo degli antichi Romani.

The strength of materials

Stella is the only manufacturer to prefer bronze over brass for the concealed components that are in directly into the walls. In this way we prevent damages caused by electrical, chemical or mechanical phenomena, as can be seen from the remarkable state of preservation of the bronze hydraulic systems of the ancient Romans.

La solidité des matériaux

STELLA est le seul fabricant qui, pour les parties encastrées en contact direct avec le mur, préfère le bronze au laiton, pour éviter les dommages occasionnés par les phénomènes électriques, chimiques ou mécaniques. L'exceptionnelle conservation des systèmes hydrauliques en bronze des anciens Romains, est la preuve de la pertinence de ce choix.

Soluzioni meccaniche e progettuali

Tutti i particolari meccanici dei prodotti Stella sono dimensionati e calcolati per fornire robustezza, affidabilità eccezionale e prestazioni idrauliche fuori del comune. Le lavorazioni meccaniche sono eseguite in piccole serie con controlli manuali ad ogni passaggio. Tutte le parti funzionanti dei prodotti Stella da incasso sono completamente asportabili e sostituibili, per procedere a qualsiasi intervento di manutenzione o di sostituzione, senza mai dover rimuovere il corpo incassato nella parete né, di conseguenza, tagliare le tubazioni e demolire il muro

Mechanics and technical solutions

All mechanical components in Stella's products are dimensioned and calculated to provide strength, exceptional reliability and hydraulic stand out performance. Mechanical processes are performed in small series, with manual checks at every stage. All operating parts of the built-in Stella products are completely removable and replaceable, to allow the carry out of maintenance or replacement operation. Without ever having to remove the built-in parts from the wall and, consequently, without cutting the pipes and damaging the surroundings.

Solutions mécaniques. Fiabilité exceptionnelle

Toutes les pièces mécaniques des produits STELLA sont dimensionnées et calculées pour fournir robustesse, fiabilité et prestations hydrauliques exceptionnelles. Les opérations d'usinage et d'assemblage sont exécutées en petites séries et soumises à un contrôle manuel à chaque étape. Le système de réglage à douille démontable des robinets et des inverseurs à encastrer corrige les erreurs éventuelles d'installation et permet de conserver un écart constant entre la poignée et la rosace, valorisant ainsi l'esthétique et la bonne réussite de l'installation. Toutes les pièces mécaniques des robinetteries à encastrer Stella sont facilement démontables et remplaçables, sans sortir les corps encastrés, donc sans casser le mur ni couper les tuyaux.

lavorazionispeciali@rubinetteriestella.it

Lavorazioni speciali: Prodotti su misura per ogni esigenza

Il "Reparto Lavorazioni Speciali" è in grado di quotare e fornire tutta una serie di prodotti e prestazioni, da finiture superficiali diverse da quelle a listino sino alla realizzazione su disegno del Committente di rubinetterie in serie limitate (lavorazioni decorative guilloché, vitoni prolungati per gruppi ad incasso, deviatori prolungati per gruppi ad incasso; tubi orizzontali e verticali dei sifoni di lunghezza particolare; - corpi miscelatori monocomando prolungati; scaldabiancheria di dimensioni e con numero di elementi differenti; bocche di lunghezza particolare).

Special processing: Customized products to solve any personal requirement.

Stella's custom processing department is on hand to provide quotes and to supply a whole range of products and services, from custom surface finishes, to the manufacture bespoke taps on client's design and specification (decorative guilloché, extra-long headworks for built-in assemblies; extra-long diverters for built-in assemblies; horizontal and vertical u-bend pipes with special lengths; extra-long single-lever mixer housings; towel-warmers with different dimensions and different numbers of elements; spouts of particular lengths).

Travaux spéciaux: Produits sur mesure pour satisfaire chaque besoin.

Le département "Travaux Spéciaux" est capable de chiffrer et de fournir toute une série de prestations, proposant d'autres finitions que celles indiquées sur tarif, ou encore la réalisation sur plan de robinetteries en série limitée (guilloché décoratif, têtes ou inverseurs prolongés pour robinetteries encastrées; tubes de siphon avec longueurs spéciales; corps de mitigeur monocommande prolongés; sèche-serviettes spéciaux; bec sur mesure.

CROMO / CHROME

Perchè le nostre finiture sono perfette?

Le finiture sono precedute da una pulitura ed una lucidatura impeccabili, per far aderire perfettamente i rivestimenti. La protezione dagli agenti chimici offerta dalla cromatura e dall'ottonatura, la purezza dell'argentatura e lo spessore superiore della doratura, garantiscono un'affidabilità e una durata eccezionali. Le finiture Stella sono celebri per la loro eccezionale qualità, alla quale si arriva anche attraverso lunghi processi di preparazione. Ciò che per altri è pronto per essere cromato, per noi è ancora grezzo. La doratura Stella è a 23,5 carati. Il suo spessore medio è perlomeno doppio del normale sino ad essere anche dieci volte superiore. L'argentatura ha uno spessore minimo di 10 micron d'argento puro.

Un deposito sottovuoto di ossido di titanio (PVD), disponibile per alcune serie o su richiesta, rende intaccabili le finiture, insensibili all'attacco di agenti chimici e con una colorazione garantita nel tempo anche in caso di ricambi.

Why are our finishes so perfect?

Before receiving their surface finishing treatments, taps receive a flawless clean and polish for the coatings to adhere perfectly. The protection from chemical agents offered by chrome-plating and brass-coating, the purity of silver-plating and the extra thickness of gold-plating, guarantee reliability and exceptionally long life. Stella finishes are renowned for their exceptional quality, which is achieved only after a long preparation process. What others consider ready for chrome-plating, we call a rough piece.

Pourquoi nos finitions sont-elles parfaites?

Les finitions sont précédées d'un nettoyage et d'un polissage impeccable, afin de faire adhérer parfaitement le revêtement. La protection contre les agents chimiques du chrome et du laiton, la pureté de l'argent (réalisé par la maison historique Dabbene à Milan) ou encore les épaisseurs importantes de la dorure garantissent une fiabilité et une durabilité exceptionnelle à ces mêmes finitions. Les finitions STELLA sont célèbres pour leur qualité exceptionnelle, obtenue entre autre grâce à un long processus de préparation. Ce qui, pour les autres, est prêt à être chromé n'est encore pour nous qu'une pièce brute.

Il processo **PVD** (PHYSICAL VAPOUR DEPOSITION) è utilizzato per le finiture di oggetti ai quali vengono richieste elevatissime caratteristiche fisiche e meccaniche oltre che grande resistenza all'usura ed alla corrosione, in diversi settori industriali soprattutto di elevato livello qualitativo e stilistico.

Oltre alle caratteristiche tecniche, il processo PVD, è assolutamente biocompatibile per quanto concerne le fasi di lavorazione e produce finiture completamente ipoallergeniche. In nessuna fase della lavorazione vengono prodotte sostanze inquinanti e residui tossici che possano avvelenare il nostro pianeta. Il processo PVD è sicuro, pulito ed ecosostenibile, non è tossico ed è utilizzato perfino per il trattamento di strumentazione medica come per le lame di bisturi, dove sono importanti l'affilatura e la sua durata, oltre che per le attrezzature di cucina, come posate, vassoi e complementi di arredo destinati a un contatto prolungato con le persone.

Il processo avviene all'interno di camere sotto vuoto, dove vengono evaporati i metalli che si intendono depositare, come ad esempio zirconio e titanio. La finitura viene quindi creata tramite un processo fisico che dona all'oggetto caratteristiche superiori a qualsiasi altro trattamento chimico o elettrochimico.

Il trattamento PVD decorativo, utilizzato da Rubinetterie Stella, permette la deposizione di uno strato sottile ma durissimo sull'articolo da rivestire per ottenere una serie di caratteristiche:

1. Resistenza alle abrasioni dovuta alla durezza (fino 1000 /2500 HV) che si ottiene sulla superficie trattata
2. Inalterabilità ai raggi UV e resistenza ai solventi e alle corrosioni
3. Uniformità di rivestimento molto elevata anche su componenti con geometria complessa e tolleranze strettissime
4. Ampia gamma di finiture superficiali che vanno dalla lucidatura brillante, satinata alle varie gradazioni di opacità
5. Ampia gamma cromatica, dettata dalla produzione interna delle finiture

The **PVD** (Physical Vapour Deposition) process is a technique used in many industrial sectors, especially those in search of incomparable quality and style, to obtain top-of-the-range physical and mechanical characteristics in addition to high resistance to time and corrosion.

In addition to its technical characteristics, the PVD process is completely biocompatible with regard to the treatment phases and allows to obtain completely hypoallergenic finishes. Our treatment process does not contain any pollutants or toxic residues that could poison our planet. This PVD process is therefore safe, clean and eco-friendly. Recognized throughout the world, it allows for example the treatment of medical instruments such as scalpel blades, whose sharpness and durability are paramount, or some kitchen elements such as cutlery, trays or any furnishing for prolonged contact with persons.

The PVD process takes place inside vacuum chambers, in which metals, such as zirconium and titanium are evaporated to be deposited. The finishing is then obtained by a physical process giving the object superior characteristics to any other chemical or electrochemical treatment.

The decorative PVD treatment, used by STELLA, allows the application of a thin but solid layer on the object to be covered in order to obtain the following characteristics:

1. Abrasion resistance (up to 1000/2500 HV) on the treated surface.
2. UV-resistant and resistant to solvents and corrosion.
3. Very high coating uniformity on various surfaces, from the simplest to the most complex geometries.
4. Wide range of finishes, ranging from glossy or satin polishing to different shades of opacity.
5. Wide choice of finishes and colours, defined and obtained inside our own production.

Le procédé **PVD** (Physical Vapour Deposition) est une technique utilisée dans divers secteurs industriels, surtout ceux à la recherche d'une qualité et d'un style incomparable, permettant d'obtenir des caractéristiques physiques et mécaniques de très haut niveau en plus d'une grande résistance au temps et à la corrosion.

Outre ses caractéristiques techniques, le procédé PVD est tout à fait biocompatible en ce qui concerne les phases de traitement et permet d'obtenir des finitions complètement hypoallergéniques. Notre processus de traitement ne contient aucun produit polluant, ni aucun résidu toxique pouvant empoisonner notre Planète. Ce procédé PVD est donc sûr, propre et éco responsable. Reconnu à travers le monde, il permet par exemple le traitement des instruments médicaux comme les lames de bistouri, dont le tranchant et la durabilité sont primordiaux, ou encore certains éléments de cuisine comme les couverts, les plateaux ou tout complément d'ameublement destinés à un contact prolongé avec les personnes.

Le procédé PVD se déroule à l'intérieur de chambres sous-vide, dans lesquelles les métaux s'évaporent dans le but d'être ensuite déposés, comme par exemple le zirconium et le titanium. La finition est ensuite obtenue par un procédé physique donnant à l'objet des caractéristiques supérieures à tout autre traitement chimique ou électrochimique.

Le traitement PVD décoratif, utilisé par les Robinetteries STELLA, permet l'application d'une fine mais solide couche sur l'objet à recouvrir afin d'obtenir la série de caractéristiques suivante :

1. Résistance à l'abrasion (jusqu'à 1000/2500 HV) sur la surface traitée.
2. Inaltérabilité aux UV et résistance aux solvants et à la corrosion.
3. Très grande uniformité de revêtement, des surfaces les plus simples aux géométries les plus complexes.
4. Large gamme de finitions, allant du polissage brillant ou satiné aux différentes nuances d'opacité.
5. Large choix de finitions et de coloris, définis et obtenus en interne de notre production.

EXCELSIOR HOTEL GALLIA, Milano, Italia

Per i raffinati frequentatori dell'alta Hotellerie, il bagno è un must: deve essere la massima espressione della bellezza, del lusso e dell'intimità. Per chi dirige un Hotel così importante, le rubinetterie devono essere anche affidabili, solide e funzionali. Valori che hanno fatto di Stella un partner storico della migliore ospitalità internazionale. Scorrendo l'elenco dei grandi hotel che hanno scelto le serie Stella, storiche o contemporanee, si apprezza il livello raggiunto dall'azienda in un settore altamente competitivo.

For the sophisticated guests of the world's top hotels, the bathroom needs to be the purest expression of beauty, luxury and intimacy. For the directors of these hotels, taps need to be reliable, solid and functional. These values made Stella a historic partner of the top international hospitality sector. One need only to look through the list of grand hotels – whether historic or contemporary – that have chosen Stella to see what levels the company has reached in one of the most competitive of all sectors.

Pour la clientèle raffinée des grands hôtels, la salle de bain doit être synonyme de beauté, de luxe et d'intimité. Pour ceux qui les dirigent, la robinetterie doit être également fiable, solide et fonctionnelle. Ces qualités ont fait de STELLA un partenaire historique de l'hôtellerie internationale de luxe. Il suffit de parcourir la liste des grands hôtels qui ont choisi les modèles STELLA, historiques ou contemporains, pour comprendre le niveau atteint par l'usine dans un des secteurs les plus compétitifs qui soit.

I migliori hotel del mondo hanno una stella in più.

Stella is the world's finest hotels' extra star.

ITALICA

Se c'è un punto di riferimento della rubinetteria di lusso, è la serie Italice. Nata addirittura ai primi del Novecento, è stata il primo successo di Stella e oggi viene riproposta con tecniche attuali. Offre eccezionali prestazioni meccaniche e idrauliche ma soprattutto una carica evocativa straordinaria che il tempo non scalfisce. Anzi...

If there is one standard-setter in luxury taps, it is certainly the Italice collection. Created way back in the early twentieth century, it was Stella's first major success and is now made using the latest techniques. The mechanical and hydraulic performance is excellent, but more than anything it has an extraordinary evocativeness that can never be tarnished by time. Quite the contrary.

S'il existe une référence en matière de robinetterie de luxe, c'est la série Italice. Née au début du XXème siècle, elle a été le premier grand succès de Stella. Elle est aujourd'hui remise en fabrication avec les technologies nouvelles. Elle offre d'exceptionnelles prestations mécaniques et hydrauliques, mais surtout elle provoque une émotion extraordinaire que le temps n'émousse pas. Bien au contraire.

Vitone Tradizionale
Headwork
Tête mécanique

Vitone Ceramico 180° a richiesta
Ceramic headwork 180° on request

Copper connections with adjustable interaxis
Entraxe réglable avec tube de raccordement en cuivre

Parti a vista disponibili nella finiture:

Cromo, Nichel o Nichel PVD, Ottone PVD, Nichel Spazzolato, Bronzo, Oro, Argento, Oro Rosa, Bronzo Scuro, PVD Ottone (Lucido, Satinato, Spazzolato) PVD Nichel (Lucido, Satinato, Spazzolato), PVD Rame (Lucido, Satinato, Spazzolato), PVD Nero (Lucido, Satinato, Spazzolato)

External part available in the following finishing: Chrome, Nickel, PVD Nickel, PVD Brass, Matt Nickel, Bronze, Gold, Silver, Dark bronze, Rose Gold, Brass PVD (Shiny, Satin, Brushed), Nickel PVD (Shiny, Satin, Brushed), Copper PVD (Shiny, Satin, Brushed), Black PVD (Shiny, Satin, Brushed).

Disponibles dans les finitions suivantes : Chrome , Nickel, Nickel PVD, Nickel Mat, Laiton PVD , Bronze, Or, Argent, Bronze Noir, Or Rose, PVD Laiton (Brilliant, Satiné, Brossé), PVD Nickel (Brilliant, Satiné, Brossé), PVD Cuivre (Brilliant, Satiné, Brossé), PVD Noir (Brilliant, Satiné, Brossé)

Sistema TC

Il brevetto di Stella per la miscelazione sulle serie tradizionali tre fori. Esteticamente tutto resta uguale, ma il rubinetto di sinistra regola la temperatura, quello di destra l'erogazione; aspetto che unisce l'estetica della rubinetteria tradizionale tre fori con i vantaggi della rubinetteria monocomando e il comfort di una miscelazione termostatica.

TC System

The TC system is the patent of Stella for mixing on the three holes washbasin for traditional collections. Aesthetically, everything remains the same, but the tap on the left controls the temperature, the one on the right controls the flow; this feature combines the aesthetics of traditional three holes taps with the advantages of single-lever faucets and comfort of a mixing thermostat.

Système TC

Le système TC est un brevet Stella qui permet d'obtenir une température stabilisée sur les robinetteries traditionnelles à 3 trous. En apparence, l'aspect du mélangeur reste le même, en réalité, le robinet de gauche commande un mitigeur thermostatique, alors que le robinet de droite ne commande que le débit. Ainsi, grâce au système TC, nous avons allié l'esthétique du mélangeur traditionnel 3 trous à l'avantage du mitigeur à commande unique et au confort du thermostatique.

ROMA

La serie Roma è in produzione ininterrottamente dal 1926. Quanti prodotti al mondo possono vantare un simile primato? I fattori del suo successo sono la classicità delle forme e la massima affidabilità tecnica, valori sempre rinnovati senza mai tradire progetto e linee originali. Che sono perfettamente di casa anche nei tempi attuali, tanto che ancora oggi Roma è "Il Rubinetto" per eccellenza.

The Roma collection has never been out of production since 1926. How many products in the world can claim such a record? Its classic design and absolute technical reliability have led to its success, and it has always been brought up to date without ever betraying the original design. Perfectly at home in the most modern settings, the Roma is still today "The Tap" par excellence.

La série Roma est en production ininterrompue depuis 1926. Combien de produits au monde peuvent se vanter d'un tel record ? La raison de son succès: une technique très fiable associée à des formes classiques, toujours renouvelées, mais qui ne trahissent jamais les lignes et le projet original. Tellement bien intégré dans notre époque que, encore aujourd'hui, Roma reste "Le Robinet" par excellence.

ROMA 3215

ECCELSA

La serie Eccelsa, nata alla fine degli anni Venti come "Serie Esagonale Extra-Lusso", viene riproposta in occasione del 125° anniversario di Stella. Rubinetto dalle forme plastiche, strepitosamente eclettico, per la sua forma particolare richiede una rara capacità progettuale e realizzativa. Disegnato in pieno periodo cubista, si adatta in modo straordinario al contemporaneo. Come solo gli oggetti di grande design sanno fare.

Eccelsa collection, created in the late 1920s as the "Extra Luxury Exagonal Collection", was reintroduced on Stella's 125th anniversary. A stunningly eclectic and sculptural tap, its particular shape requires rare planning and manufacturing skills. Originally created at the height of the Cubist period, like the other two historic collections, it fits perfectly to contemporary settings, as only items of the finest design can do.

La série Eccelsa, qui vit le jour à la fin des années en tant que "Série Exagonale Extra Luxe", revient à l'occasion du 125ème anniversaire de Stella. Robinet aux lignes subtiles et sophistiquées, il demande, par sa forme particulière, une rare compétence dans la conception et dans la réalisation. Dessinée en pleine période cubiste, l'Eccelsa s'adapte de façon étonnante à la tendance contemporaine, comme seuls les objets de grand design savent le faire.

Vitone Tradizionale
Headwork
Tête mécanique

Vitone Ceramico 180° a richiesta
Ceramic headwork 180° on request
Tête céramique (180°) sur demande

Disponibles dans les finitions suivantes : Chrome , Nickel, Nickel PVD, Nickel Mat, Laiton PVD , Bronze, Or, Argent, Bronze Noir, Or Rose, PVD Laiton (Brilliant, Satiné, Brossé), PVD Nickel (Brilliant, Satiné, Brossé), PVD Cuivre (Brilliant, Satiné, Brossé), PVD Noir (Brilliant, Satiné, Brossé)

Tubetti di collegamento, regolabili per interasse su sanitario, in rame
Copper connections with adjustable interaxis
Entraxe réglable avec tube de raccordement en cuivre

Sistema TC

Il brevetto di Stella per la miscelazione sulle serie tradizionali tre fori. Esteticamente tutto resta uguale, ma il rubinetto di sinistra regola la temperatura, quello di destra l'erogazione; aspetto che unisce l'estetica della rubinetteria tradizionale tre fori con i vantaggi della rubinetteria monocomando e il comfort di una miscelazione termostatica

TC System

The TC system is the patent of Stella for mixing on the three holes washbasin for traditional collections. Aesthetically, everything remains the same, but the tap on the left controls the temperature, the one on the right controls the flow; this feature combines the aesthetics of traditional three holes taps with the advantages of single-lever faucets and comfort of a mixing thermostats.

Système TC

Le système TC est un brevet Stella qui permet d'obtenir une température stabilisée sur les robinetteries traditionnelles à 3 trous. En apparence, l'aspect du mélangeur reste le même, en réalité, le robinet de gauche commande un mitigeur thermostatique, alors que le robinet de droite ne commande que le débit. Ainsi, grâce au système TC, se trouve réuni l'esthétique du mélangeur traditionnel 3 trous, l'avantage du mitigeur à commande unique et le confort du thermostatique.

SIRIUS

L'architetto Arnaud Behzadi si è dedicato per svariati anni a progetti residenziali di alto livello in Francia e all'estero. Grazie alla partnership con Stella nasce il progetto di rubinetteria denominato Sirius. La collezione si contraddistingue da una linea sobria e raffinata con forme arrotondate e una trama dentellata, interamente in ottone e disponibile in 19 varianti di finitura.

Architect Arnaud Behzadi dedicated several years to high-level residential projects in France and abroad. Through his partnership with Stella, the new Sirius collection was designed. The series is distinguished by sober and refined lines with rounded shapes and a notched weft, entirely in brass and available in 19 different finishes.

L'architecte Arnaud Behzadi s'est consacré pendant de nombreuses années à des réalisations en résidentiel haut de gamme en France et à l'étranger.

Dans cette démarche, Arnaud Behzadi s'est approché du fabricant italien de Robinetterie Stella afin de dessiner une nouvelle ligne de robinetterie. Le projet voit le jour sous le nom de Sirius. Il s'agit d'une ligne sobre, épurée aux formes arrondies et d'une texture crantée, intégralement en laiton et qui se décline dans près de dix-neuf teintes différentes.

SWAN

La serie Swan si contraddistingue per unicità formale, per una selezione di dettagli meccanici e di lavorazione e per materiali e finiture di lusso con cui è corredata tutta la collezione. Le maniglie e le placchette in cristallo Swarovski, le bocche fuse con il piumaggio cesellato a mano, le quasi 350 incisioni con microfresse per i dettagli sui rosoni....queste sono solo alcune delle particolarità della collezione qui presentata in cromo e nella preziosa finitura oro 23,5 kt.

The Swan series is distinguished by its unique shapes, its proven mechanics, its materials and its luxurious finishes available for the entire collection. The handles and pictograms made of Swarovski crystal, fused spouts with hand-chopped feathers, the 350 or so incisions made on the rosettes thanks to micro-cutters... As many features that make up the series, presented here in Chrome and its precious 23.5kt Gold finish.

La série Swan se distingue par ses formes uniques, sa mécanique éprouvée, son sens du détail, pour ses matériaux et ses luxueuses finitions disponibles pour toute la collection. Les poignées et les pictogrammes en cristal Swarovski, les becs fondus avec un plumage ciselé à la main, les quelques 350 incisions exécutées sur les rosaces à l'aide de micro fraises ... Autant de particularités qui composent la série, présentée ici en Chrome et sa précieuse finition Or 23,5kt.

TIMEASTER

Nel 1982 l'Architetto Carlo Santi, progetta la serie Aster, connubio perfetto tra design e innovazione meccanica integrando il sistema antifrizione Protector™. Oggi nasce TimeAster di Stella, evoluzione tecnica ed estetica con evidenti richiami alla meccanica di precisione dell'orologeria più tecnologicamente sofisticata ed apprezzata.

In 1982 Architect Carlo Santi designed Aster Collection, perfectly joining Design and mechanical innovation with the integration of patented Protector™ system. Today TimeAster by Stella represents the natural evolution of that project with clear references to the most sophisticated and appreciated watchmaking factories.

En 1982, l'architecte Carlo Santi dessine la série Aster, synthèse parfaite entre design et innovation mécanique intégrant le système anti usure Protector®. La naissance aujourd'hui de TimeAster, avec son esthétisme et son évolution technique, rappelle la mécanique de précision de l'horlogerie, appréciée pour sa technologie sophistiquée.

ASTER

Design essenziale e raffinato, dall'affidabilità senza pari. La purezza del cerchio dà leggerezza e carattere alla maniglia, elemento centrale della linea, progettata con particolare attenzione all'ergonomia. Un'altissima coerenza formale armonizza nel progetto anche le bocche d'erogazione ed i gruppi da incasso. La serie Aster vanta una soluzione tecnica unica, il meccanismo brevettato Protector. Montato all'interno delle maniglie, permette di chiudere il rubinetto senza mai forzare la guarnizione, riducendone enormemente l'usura ed assicurandone una vita lunghissima.

Essential and stylish design, with unparalleled reliability. The purity of the circle gives the handle personality with a touch of lightness. This is the key element of the collection and has been designed for perfect ergonomics. Absolute harmony in the design makes the spouts a perfect match for the flush-mounted units. Aster boasts the patented Protector mechanism, a unique technical solution. Mounted inside the handles, it enables the tap to be turned off without straining the seal, thus drastically reducing wear and ensuring an extremely long working

Design efficace et raffiné, à la robustesse sans pareil. La pureté du cercle donne sa légèreté et son caractère à la poignée, élément central étudié avec une attention particulière pour l'ergonomie. L'équilibre des formes donne une grande homogénéité allant des becs des mélangeurs aux robinets à encastrer. Aster propose une solution technique exclusive, le mécanisme breveté Protector. Monté à l'intérieur de la poignée, il permet de fermer le robinet sans jamais forcer sur le clapet, réduisant ainsi l'usure. Il assure ainsi au clapet une grande longévité.

BOX

Nati alla fine degli anni '70, i miscelatori monocomando della serie Box hanno anticipato High-Tech e Minimalismo. Il loro design indica chiaramente ogni funzione. La bocca in tubo, la scatola dei meccanismi, la leva di comando con lo smusso d'appoggio: ogni particolare fa chiaramente intuire la semplicità del movimento di manovra. L'equilibrio dell'insieme ne fa un miscelatore dal design netto, essenziale e tecnologico, e assolutamente coerente con le attuali esigenze dell'interior design.

First made in the late 1970s, the Box collection of single-lever mixers was a precursor of the high-tech and minimalist styles. Its design clearly reveals every function. The tube spout, the housing containing the mechanisms, the control lever with the chamfered grip: every detail points to the simplicity of the manoeuvre required. The overall harmony of the unit gives this mixer a clean, essential and technological look.

Créée à la fin des années 70, la série de mitigeurs monocommandes Box a été à l'avant garde du minimalisme et des tendances High Tech. Le dessin de chaque détail indique clairement la fonction: le bec tube, la boîte du mécanisme, l'encoche du levier de commande mettent en valeur la simplicité du mouvement de manoeuvre.

L'équilibre de l'ensemble en fait un mitigeur au design net, essentiel et technologique. Box, malgré toute ces années d'existence reste cohérent avec les exigences actuelles de la décoration d'intérieur.

STELLA

Design Luca Scacchetti

Stella ha deciso di dare il proprio nome ad un progetto che segna una nuova frontiera nella ricerca estetica e tecnica. Una linea semplicissima eppure estremamente originale, con una maniglia dalla forte carica semantica che invita al tocco come alla visione. L'equilibrio raggiunto dalle forme asimmetriche esalta l'unicità di questo oggetto di design. La serie Stella utilizza il vitone in ceramica, soluzione tecnica che permette di raggiungere la massima apertura del rubinetto con appena mezzo giro di maniglia.

Stella has decided to give its own name to a project that opens up a new idea in aesthetic and technical research. The design is extremely simple and yet highly original, with a handle that introduces a powerful personality. It is an invitation to touch as well as to look. The balance of asymmetrical shapes intensifies the uniqueness of this design object. Stella collection uses ceramic headwork, a technical solution that makes it possible to open the tap fully with just half a turn of the handle.

Stella a décidé de donner son propre nom à une série qui marque une nouvelle frontière dans la recherche esthétique et technique. Une ligne très simple, et pourtant extrêmement originale, avec une poignée dont la forme éloquente invite au toucher comme au regard. L'équilibre obtenu par les formes asymétriques exalte le caractère de cet objet de design. La série Stella utilise des mécanismes céramiques, solution technique qui permet d'obtenir une ouverture maximale avec seulement un demi tour de poignée.

130

Design Michele De Lucchi - Philippe Nigro

La serie 130, disegnata dall'Architetto De Lucchi in occasione dell'anniversario di Stella prevede una forma fluida e slanciata, maniacalmente studiata nella sua plasticità. È fortemente sfiancato per equilibrare la massa del corpo con la prensilità e la funzionalità d'uso. In tutte le sue declinazioni, l'effetto floreale rimane l'elemento caratteristico e associa una ricercata eleganza a un grande senso di plasticità

130 collection aims to be the new contemporary classic Line in Stella's catalogue.

Michele De Lucchi defines collection 130 as "a model with smooth and sleek shape, in all its variations, the floral effect remains the hallmark, in combination with a refined elegance and a great sense of plasticity in maintenance and cleaning."

Le modèle 130, conçu par l'Architecte Michele De Lucchi, possède des formes fluides et élancées, avec une plastique étudiée de façon rigoureuse. Il est tout en courbe pour équilibrer la masse du corps, la fonctionnalité et l'ergonomie de sa manette. Dans tous les modèles, l'effet floral reste l'élément distinctif qui associe élégance et usage pratique pour l'entretien et le nettoyage.

TITIAN

Design Michele De Lucchi

La serie Titian deve il suo nome alla pronuncia cinese dell'ideogramma che identifica le terrazze coltivate dell'Asia. Il tratto peculiare è la struttura piramidale a cerchi concentrici, che crea la base del rubinetto o delle maniglie, donandole una forma insolita, ma estremamente elegante e leggera. Il progettista, l'Architetto De Lucchi la definisce come "una vera e propria scultura che ha a che fare con le piramidi, con certe forme della cultura precolombiana e con i giardini pensili"

Titian's name refers to the pronunciation of the Chinese ideogram that identifies the cultivated terraces in Asia. The peculiar trait of Titian Series is the pyramidal structure with concentric circles, which creates the base of the faucet or handles, giving it an unusual but extremely elegant shape. De Lucchi defines it as "a real sculpture related with the pyramids, with some forms of pre-Columbian culture and the hanging gardens."

Titian conçue par l'Architecte Michele De Lucchi, est surtout une sculpture qui rappelle les pyramides et certaines formes de la culture précolombienne avec ses jardins suspendus mais qui, modernisée, révèle alors une grande technicité grâce à sa composition parfaite et ses proportions rigoureuses. C'est une pièce très architecturale parce que c'est une vraie construction où chaque anneau conserve étrangement sa propre pureté et sa propre cohérence, dans tous les produits de la série.

CASANOVA

Design Maurizio Duranti

Una serie di rubinetterie ispirata decisamente al mondo neoclassico. Superfici cannettate di libera ispirazioni a lesene classiche e ad una sobrietà stilistica antitetica al barocco. Si tratta di una serie di oggetti che hanno la funzione di essere rubinetti ma che potrebbero essere qualunque cosa purchè legata all'eleganza di un mondo raffinato e sofisticato che ci rimanda alla Venezia di Casanova, o meglio, al mondo di Casanova.

A collection that drew deeply on neoclassical world. Veined surfaces, based on classical pilasters and a sober style antithetical to baroque. This is a collection of objects that are meant to be faucets, but could be anything linked to the elegance of a refined and sophisticated world that reminds us of the Venice of Casanova, or rather the world of Casanova.

Une série de robinetterie clairement influencée par le Néo-Classicisme. Sa surface cannelée est librement inspirée des colonnes grecques et son style sobre est exactement l'antithèse du baroque. La fonction première de cet objet est d'être un robinet, mais il pourrait tout à fait trouver sa place pour d'autres usages dans un monde raffiné et sophistiqué à l'instar de la Venise de Casanova ou plus largement du Monde de Casanova.

Design Giampiero Castagnoli

La serie "Firenze" si ispira direttamente al Battistero di San Giovanni in Firenze, l'edificio più antico della città a pianta ottagonale citato da Dante nella Divina Commedia. Come il Battistero la sezione è ottagonale richiamando tutto il simbolismo allegorico della tradizione medievale. Questa soluzione esalta il rigore delle forme, conferendo al corpo la nitidezza di un solido geometrico regolare, tipico del Romanico Fiorentino.

Firenze collection is directly inspired by the Baptistery of San Giovanni in Florence, the oldest octagonal building in the city, mentioned in Dante's Divina Commedia. Like the Baptistery it has an octagonal section that recalls the medieval tradition of allegorical symbolism. This solution enhances the rigor of the forms, giving the body the sharpness of a regular geometric solid, typical of Florentine Romanesque.

La série Firenze est directement inspirée par le baptistère de San Giovanni à Florence, le plus ancien bâtiment octogonale de la ville, mentionné dans la Divina Commedia de Dante. Comme le Baptistère, il a une section octogonale qui rappelle la tradition médiévale du symbolisme allégorique. Cette solution améliore la rigueur des formes, qui donne au corps la netteté d'une géométrie solide et régulier typique de l'art roman florentin.

SIMPLE

Design Giampaolo Benedini

Simple è un nuovo ed innovativo progetto di Rubinetterie Stella pensato per rispondere all'esigenza di personalizzazione della rubinetteria dell'ambiente bagno che, sempre più, viene avvertita dai progettisti, dagli interior designer e, più in generale, dal segmento di mercato che ricerca prodotti di alta gamma. Sino ad ora non era mai stata applicata, nell'ambito del comparto, la tecnologia digitale al servizio della scelta di personalizzazione. Simple, consente infatti al committente di esprimere compiutamente il proprio gusto attraverso una combinazione di archetipi modulari e rende semplice e immediato un processo che con metodi tradizionali sarebbe impossibile. Simple, quindi, non si pone come una nuova collezione, ma come un vero e proprio "sistema" in grado di creare "il rubinetto proprio come lo si vorrebbe", avvalendosi di un configuratore digitale progettato e realizzato proprio per questo scopo con il supporto delle tecnologie informatiche più innovative: una procedura guidata e visuale per realizzare un prodotto unico, declinabile in decine di migliaia di possibili soluzioni.

SIMPLE is a brand new and innovative STELLA' s project. Created to meet the requirement and the need in customization of the Bath and Shower Industry, architects and interior designers', SIMPLE is announced as an innovative tool for this Luxury Market segment. So far, the sector had never benefited from the Digital Technology in the service of choice and customization. SIMPLE allows to express and compose according to your own tastes and ideas through a combination of flexible elements. Indeed, a process that, using traditional methods would be impossible to realize, becomes entirely feasible, immediate and ... simple. Thus, SIMPLE should not be perceived as a new collection, but as a real digital tool, to create in few steps the tap you always wanted thanks to our configurator. So, the technologies and computing innovations will allow you to realize a unique and immediately visible product, declinable in about ten thousands possible solutions.

SIMPLE est un nouveau projet innovant des Robinetteries STELLA. Pensé pour répondre à l'exigence et au besoin de personnalisation de la Salle de Bain qui, de plus en plus, se développe et s'ancre dans l'esprit des architectes et des interior designers, SIMPLE s'annonce comme un outil novateur pour la Robinetterie de luxe. Même à ce jour, le Secteur n'avait jamais bénéficié de la Technologie Digitale au service du choix et de la personnalisation. SIMPLE permet, en effet, d'exprimer et de composer selon ses propres goûts et idées à travers une combinaison d'éléments modulables. Ainsi, une démarche qui, via des méthodes traditionnelles, serait impossible à réaliser devient tout à fait faisable, immédiate et ... simple. SIMPLE ne doit donc pas être perçu comme étant une nouvelle collection, mais comme un véritable système capable de créer en quelques étapes le robinet désiré à l'aide du configurateur digital. Ainsi, les technologies et innovations informatiques permettront de réaliser un produit unique, visible instantanément et déclinable en une dizaine de milliers de solutions possibles.

Esempi di possibili configurazioni di gruppi miscelatore e lavabi, a fianco una selezione di componenti relativi a maniglie, bocche, basi e cappucci tra quelli messi a disposizione dal configuratore del progetto Simple

Examples of possible concealed mixers and three-holes washbasins configurations, as well as a selection of components related to handles, spouts, bases and rosettes among those suggested by SIMPLE configurator.

Exemples de configurations possibles des mitigeurs et lavabos encastrés trois trous, ainsi qu'une sélection de composants liés aux poignées, becs, embases et rosaces parmi ceux proposés par le configurateur SIMPLE.

Configurazione 2 vie completa di parti in vista e incassi
2-way configuration thermostatic mixer with concealed body
Configuration complète parties encastrées et apparentes

Cromo/Chrome **1.139,00**

Il configuratore è disponibile sul sito internet www.simpletap.it o tramite APP per IOS e ANDROID (cercare Simpletap su Apple Store o Google Play). Le procedure guidate del configuratore permettono una volta selezionata l'installazione (lavabo, doccia, vasca) e la tipologia (tre fori, monocomando, incasso ecc) di "creare" il proprio rubinetto, opzionando le diverse forme e finiture proposte, fino ad arrivare ad un risultato ottimale per l'utente progettista. La scheda tecnica relativa alla propria configurazione può essere salvata/stampata o inoltrata via mail per richieste commerciali successive.

The configurator is available on www.simpletap.it or thanks to the application for IOS and ANDROID (search for Simpletap on the Apple Store or Google Play). The assisted procedures by the Configurator allow, once the Installation (washbasin, shower, bathtub) and the Type (three-holes, single-hole, concealed mixer) selected, to create your very own tap using the different shape and finishes options available, until reaching an optimal result for the user. The data sheet relative to your configuration can be saved/printed or forwarded by email within for the next commercial requests.

Le configurateur est disponible sur le site www.simpletap.it ou via l'application pour IOS et ANDROID (recherchez Simpletap sur l'Apple Store ou Google Play). Les procédures guidées du configurateur permettent, une fois l'installation (lavabo, douche, baignoire) et le type (trois trous, monotrou, encastré etc.) choisis, de "créer" votre robinet en utilisant les différentes options de formes et de finitions proposées, jusqu'à arriver à un résultat optimal pour l'utilisateur qui conçoit. La fiche technique relative à votre configuration peut être sauvegardée/imprimée ou transmise par email pour les prochaines demandes commerciales.

La possibilità di personalizzazione nelle forme del progetto Simple, modulare e istantanea (si pensi alla velocità ad un aggiornamento dell'App o del sito che accresca le forme utilizzabili), comprende ovviamente anche le finiture. Gli elementi principali sono declinabili nelle finiture che possono essere fino a 4 diverse all'interno di un rubinetto.

The customization possibilities concerning SIMPLE project's shapes, flexible and immediate (think about keeping updated the App to benefit of all usable shapes), also include the finishes. The main elements can be selected in all finishes, up to 4 by tap.

Les possibilités de personnalisation concernant les formes du projet SIMPLE, modulables et instantanées (pensez à mettre à jour l'App pour bénéficier de toutes les formes utilisables), incluent également les finitions. Les éléments principaux peuvent être déclinés dans toutes le finitions, jusqu'à 4 par robinet.

BAMBOO

Design Marco Piva

Originale ma rigorosa, funzionale ma decorativa, tonda o quadra, la serie Bamboo è la risposta più attuale alle esigenze dell'interior design contemporaneo. Minimal ma con un forte carattere, è una linea di miscelatori e rubinetterie tradizionali che garantisce prestazioni tecniche ed ergonomiche di primissimo piano. Sempre, il design consente un'impugnatura naturale ed una semplicissima manovra di regolazione.

Original but meticulous, functional but decorative, round or square, Bamboo is the most up-to-date solution for contemporary interior-design needs. Minimalist but with a strong personality, this collection of mixer taps offers the highest level of technical and ergonomic performance. The handle is designed to afford a natural grip and the simplest of movements.

Original mais rigoureux, fonctionnel mais décoratif, Bamboo est la réponse la plus actuelle aux exigences des intérieurs contemporains. Minimal avec un caractère affirmé, c'est une ligne de mitigeur et de robinetterie traditionnelle qui garantit des performances techniques et ergonomiques de premier plan. Comme toujours, le design permet une prise en main naturelle et assure une simplicité d'utilisation.

LUCILLA

Semplice ed elegante, è progettata e costruita interamente in Italia con gli stessi criteri di qualità assoluta, nessuno escluso, che contraddistinguono il resto della produzione: lucidatura, nichelatura, cromatura, qualità dei componenti. Il tutto in un prodotto raffinato ma di facile lettura, con il rubinetto disponibile in altezze e con bocche differenti, per soddisfare qualsiasi esigenza pratico-estetica.

Simple and elegant, it is completely designed and manufactured in Italy with the same criteria of absolute quality, without exception, that distinguish the rest of Stella's production: the polishing, nickel-plating, and chrome-plating and the quality of the components are the cream of worldwide production, and are made to last. All wrapped up in a product that is sophisticated, yet easy to use, with taps that come in various heights and with different nozzles, perfect for any requirement of use and aesthetics.

Simple et élégante, elle est entièrement conçue et fabriquée en Italie, avec le même soin et la même qualité qui distinguent habituellement la production Stella polissage, nickelage et chromage irréprochable, qualité de chaque composant, tout ce qui positionne, depuis longtemps, la marque au sommet de la production mondiale. Tout cela dans un produit raffiné, mais d'un usage accessible, disponible en plusieurs hauteurs, et avec différents becs, pour pouvoir satisfaire toutes les exigences pratiques et esthétiques.

BAMBOO QUADRO

Design Marco Piva

Bamboo Quadro è la serie a sezione quadra. Modernità e funzionalità si fondono in un rubinetto: contemporaneo e proiettato al futuro

Bamboo Quadro is the square section series. Modernity and function therefore seem to merge into a single object: contemporary yet with a view to the future.

Bamboo Quadro est la série à section carrée dessinée par Stella. Une série contemporaine d'aujourd'hui et de demain, où modernité et fonctionnalité semblent se confondre.

WELLNESS

L'ambiente doccia, negli ultimi anni, è diventato il fulcro dello spazio dedicato al benessere e alla cura della persona all'interno della casa. Il programma doccia di Stella, completo di ogni elemento tra cui soffioni, colonne doccia, doccette, complementi e rubinetteria, nasce con il preciso intento di ricreare con la tecnologia e qualità che ci contraddistingue la migliore soluzione per il wellness, sia che si tratti del bagno domestico sia per le docce dei bagni dei più prestigiosi Hotel.

These last years, bathroom became the dedicated space for Well-being and personal care at home. Stella's Shower Program, including shower taps, columns, shower heads, complements and fittings, was born to recreate, by allying Technology and Quality, a Wellness space for a domestic bathroom as for showers and baths of the most prestigious Hotels.

Ces dernières années, la Salle de Bain est devenue l'espace dédié au Bien-être et au soin de la personne à domicile. Le Programme Douche de Stella, comprenant pommes, colonnes, douchettes, compléments et robinetteries, est né dans le but précis de recréer, en alliant Technologie et Qualité, un espace Wellness, pour une salle de bain domestique comme pour les douches et bains des plus prestigieux Hotels.

CURA E GARANZIA DEI SOFFIONI

IMPORTANTE! RICORDIAMO CHE LA GARANZIA NON COPRE I DANNI CAUSATI DAL DEPOSITO DI CALCARE, DI IMPURITÀ O SE L'APPARECCHIO RISULTERÀ AVER SUBITO TRATTAMENTI DIVERSI DA QUELLI SUGGERITI.

Per evitare danni al vostro bagno e all'apparecchiatura acquistata vi invitiamo a seguire le seguenti raccomandazioni di utilizzo:

- spurgare l'impianto prima di procedere con l'installazione dell'apparecchio;
- pulire periodicamente le testate di erogazione dell'acqua da eventuali depositi di calcare;

PULIZIA PARTI METALLICHE

- Per la semplice pulizia delle parti metalliche è sufficiente utilizzare un panno morbido inumidito con acqua e sapone. Per evitare la formazione di macchie dovute alla presenza di calcio nell'acqua si consiglia di asciugare con un panno dopo ogni utilizzo.

CONSIGLIO: l'installazione di un impianto di filtraggio e addolcitura dell'acqua migliore e prolunga la vita dei vostri apparecchi e dell'impianto stesso. L'uso di detersivi contenenti alcol, acido cloridrico, acido fosforico, candeggina, cloro e le polveri abrasive possono danneggiare irreparabilmente il vostro soffione.

Gli ugelli del soffione, realizzati in silicone, vanno ripuliti dai sedimenti (calcare) con l'ausilio delle dita. Sarà sufficiente eseguire piccoli movimenti rotatori sull'ugello otturato per liberarlo da ogni ostruzione. In caso di utilizzo costante della doccia, si consiglia una pulizia approfondita mensile.

L'apparecchio è coperto da garanzia di 2 anni contro difetti o vizi di fabbricazione. La garanzia non copre danni causati da :

- Installazione e/o utilizzo diversi da quelli suggeriti.
- Errata predisposizione e realizzazione dell'impianto idrico.
- La normale e fisiologica usura per un utilizzo corretto.
- Depositi di calcare o altre impurità.
- Impieghi di materiali di pulizia differenti da quelli qui indicati.

Rubinerie STELLA certifica l'assoluta compatibilità tra le componentistiche STELLA e quelle fornite in questo listino Wellness. Rubinerie STELLA si riserva di apportare modifiche migliorative ai prodotti e modifiche agli schemi o prezzi di questo catalogo

SHOWER HEADS' CARE AND WARRANTY

IMPORTANT! WE REMIND YOU THAT THE WARRANTY DOES NOT COVER THE DAMAGES DUE TO LIMESTONE DEPOSITS, IMPURITIES OR IF THE EQUIPMENT UNDERGOES TREATMENTS OTHER THAN THOSE RECOMMENDED.

In order to avoid damaging the installation or the acquired equipments, we invite you to follow these directions:

- Purge the installation before proceeding to the implementation of the equipment.
- Clean regularly the water spikes in order to avoid any limestone deposits.

METAL PARTS CLEANING

For the maintenance of metallic parts, a simple moistened soft tissue associated with some water and some soap is enough. To avoid the formation of spots due to limestone, we recommend to wipe the equipment after every use.

ADVICE: The implementation of a filter and a water softener improves the life expectancy of your equipment and installation. The use of cleaning products containing alcohol, hydrochloric and phosphoric acids, bleach, chlorine and/or abrasive dust can damage them in an irreversible way.

Our shower heads' spikes, made of silicone, can be simply cleaned with fingers to remove the limestone deposits or impurities. For that purpose, you can simply proceed by small rotary movements on every blocked spike to reduce the congestion. In the context of a sustained use of the shower, we recommend a monthly in-depth cleaning.

The equipments are 2-years guaranteed against general and manufacturing defects.

This warranty does not cover any damages caused by:

- An installation and/or a use other than those recommended.
- A bad hydraulic implementation.
- Normal wear and tear.
- Limestone deposits and/or other impurities.
- The use of cleaning products other than those recommended.

STELLA certifies the absolute compatibility between STELLA components and those present in this Wellness price list. STELLA reserves the right to bring modifications to products as well as to schemes and prices given in this catalog.

ENTRETIEN ET GARANTIE DES POMMES DE DOUCHE

IMPORTANT ! NOUS RAPPELONS QUE LA GARANTIE NE COUVRE PAS LES DOMMAGES DUS AU DÉPÔT DE CALCAIRE, D'IMPURETÉS OU SI L'APPAREILLAGE A SUBI DES TRAITEMENTS AUTRES QUE CEUX PRÉCONISÉS.

Afin d'éviter d'endommager votre installation ou les appareillages acquis, nous vous invitons à suivre les conseils d'utilisation suivants :

- Purger l'installation avant de procéder à la mise en place de l'appareillage.
- Nettoyer régulièrement les picots de sortie d'eau afin de palier au dépôt de calcaire.

NETTOYAGE DES PARTIES MÉTALLIQUES

Pour l'entretien des parties métalliques, un simple tissu doux humidifié associé à de l'eau et du savon suffit. Afin d'éviter la formation de tâches dues à la présence de calcaire dans l'eau, il est recommandé d'essuyer l'appareillage après chaque utilisation.

CONSEIL : la mise en place d'un filtre et d'un adoucisseur d'eau améliore la durée de vie de votre appareillage et de son installation. L'usage de détergents contenant alcool, acide chlorhydrique, phosphorique, eau de Javel, chlore et/ou poussière abrasive peuvent endommager ce dernier de manière irréversible.

Les picots de nos pommes de douche, réalisés en silicone, peuvent être simplement nettoyés à l'aide des doigts afin de retirer les dépôts de calcaire ou d'impuretés. Pour cela, il suffit de procéder par de petits mouvements rotatifs sur chaque picot obstrué afin de le désengorger. Dans le cadre d'une utilisation soutenue de la douche, nous recommandons un nettoyage mensuel approfondi. L'appareillage est garanti 2 ans contre les défauts et vices de fabrication.

Cette garantie ne couvre pas les dommages causés par :

- Une installation et/ou une utilisation autre(s) que celle(s) préconisée(s)
- Une mauvaise implantation hydraulique.
- L'usure normale due à l'utilisation de l'équipement.
- Des dépôts de calcaire et/ou d'autres impuretés.
- L'utilisation de produits d'entretien autres que ceux préconisés.

Les Robinetteries STELLA certifient l'absolue compatibilité entre les composants STELLA et ceux présents dans ce tarif Wellness.

Les Robinetteries STELLA se réservent le droit d'apporter des modifications d'optimisation aux produits ainsi qu'aux schémas et prix de ce catalogue.

NOTA IMPORTANTE PER RUBINETTERIA

Il numero indicato nel riquadro di ogni articolo e seguito dalla lettera "W" indica il numero di rubinetti che richiede il gruppo per il corretto funzionamento. Nel caso di composizioni complesse (esempio soffione + doccia + eventuali completamenti) si prega quindi di calcolare la somma prima di provvedere all'ordine del miscelatore termostatico IS3295 (completa di parte incasso e vista) e dei rubinetti 0/158 (incasso e parti in vista), in numero uguale alle uscite che la configurazione doccia richiede. Nell'esempio prevedere 3 rubinetti bypass 0/158 e un miscelatore IS3295 per il corretto funzionamento del soffione e della doccia.

IMPORTANT NOTE CONCERNING FITTINGS

The given number in the square icon, followed by the letter "W", indicates the number of taps required for an optimal running of the group. In a complex setup (e.g. shower tap + shower hand + possible completions), it is then necessary to calculate this quantity before ordering the IS3295 thermostatic control tap (concealed and visible parts) and the 0/158 taps (concealed and visible parts). The amount of taps then has to correspond with the number of exits required by the shower configuration

NOTE IMPORTANTE POUR LA RUBINETTERIE

Le numéro inscrit dans le carré de signalétique, suivi de la lettre « W », indique le nombre de robinets nécessaires au bon fonctionnement du groupe. Dans le cadre de compositions complexes (ex : pomme + douchette + compléments éventuels), il faut alors calculer cette quantité avant de procéder à la commande du mitigeur thermostatique IS3295 (parties encastrées et apparentes) et des robinets 0/158 (parties encastrées et apparentes). Le nombre de robinets doit alors correspondre au nombre de sorties requises par la configuration de la douche.

TELETRON ECCELSA 6201

Rubinetto elettronico monoacqua, con sensore infrarossi, alimentazione a batteria al litio con kit portabatteria IP67 e con rubinetto filtro-arresto-regolazione portata. Funzione sicurezza antiallagamento

*per impianti centralizzati si consiglia l'utilizzo di un miscelatore termostatico Isomix IS3293, come illustrato nella pagina successiva

Single water electronic tap, infrared sensors, lithium battery, stopping and flow regulating filter tap.

Anti-flooding system.* for centralized systems we recommend the use of a thermostatic mixer IS3293, as shown in the next page

Robinet électronique une seule arrivée d'eau, capteur infrarouge, batterie au lithium avec robinet d'arrêt et réglage de débit et filtre. Fonction de sécurité anti-débordement. *Pour les systèmes centralisés, nous recommandons l'utilisation du mélangeur thermostatique IS3293, comme indiqué sur la page suivante

NOTE TECNICHE INSTALLAZIONE

GRUPPI LAVABO TRE FORI (3225/3226/3224P...)

La possibilità d'installazione su sanitario o piano orizzontale è possibile fino ad uno spessore di 45mm

GRUPPI DOTATI DI DEVIATORE AUTOMATICO (3254MC...)

Per i gruppi dotati di deviatore a ritorno automatico alla posizione vasca è necessaria una pressione dinamica di almeno 0,5 bar

GRUPPI BORDO VASCA (3256, 3256TC, 3256TC308...)

Per i gruppi bordo vasca prevedere la possibilità di accesso alla parte sottostante il bordo della vasca per l'eventuale sostituzione del tubo flessibile e dei componenti

GRUPPI LAVABO e BIDET da INCASSO (3229,3863,3861...)

Per i gruppi lavabo e bidet incasso le congiunzioni interne vengono fornite non montate

RUBINETTI TELETRON

Per il corretto funzionamento del rubinetto elettronico Teletron è indispensabile utilizzare il rubinetto di arresto/regolazione/filtro fornito a corredo

RUBINETTI DI CACCIATA 703 e 704 diametro 3/4"

La tubazione d'alimentazione deve avere un diametro adeguato alle dimensioni del rubinetto prescelto, si consiglia un diametro del tubo di discesa di 26 mm

Per un lavaggio efficace si richiede una pressione dinamica minima di 2,5 bar, la pressione statica massima di chiusura è di 3 bar

Montare una saracinesca o un rubinetto di regolazione a monte del rubinetto di cacciata. La curva della tubazione a parete deve avere un andamento dolce per favorire il regolare deflusso d'acqua, non utilizzare gomiti o curve a raggio ridotto

FLUSSOMETRO 3810

Si consiglia una pressione dinamica minima di 1,5 bar

3820 + 3820B

La placca per cassette di scarico è compatibile con i sistemi Geberit Sigma UP320 e UP720

UP720 (SIGMA 8CM) Code 109.770.00.1 - SIGMA 8CM Code 109.790.00.1 - UP320 (SIGMA 12CM) Code 109.300.00.5 - 109.330.00.5 - COMBIFIX Code 110.770.00.1 - 110.358.00.5 - DUOFIX Code 111.726.00.1 - 111.300.00.5

TECHNICAL NOTE FOR INSTALLATION

THREE HOLE WASHBASIN MIXER (3225/3226/3224P...)

Installation on horizontal surface not over 45 mm thick

DIVERTER WITH AUTOMATIC RETURN (3254MC...)

Diverter with automatic return to bath position needs a minimum required dynamic pressure of 0,5 bar

DECK MOUNTED BATH and SHOWER MIXER (3256, 3256TC, 3256TC308...)

Deck mounted bath and shower mixer needs access to part beneath deck for hose replacement if required

CONCEALED WASHBASIN MIXER(3229,3863,3861...)

Concealed washbasin and bidet mixer equipped with not assembled internal connections

TELETRON

For proper operation of the electronic tap Teletron, it is necessary to use the provided shut off-control-filter valve

FLUSHING TAPS 703 and 704 diameter 3/4"

The alimentation pipe must have a suitable diameter to the size of the chosen tap, we recommend a pipe with an internal diameter of 26mm

For an effective washing we require a minimum dynamic pressure of 2.5 bar, the maximum static closing pressure is of 3 bar.

Install a stopcock or a control valve tap upstream the flushing tap. The curve of the pipe must have a sweet trend to facilitate the smooth deflow of water, do not use elbows and short radius curves

AUTOMATIC FLUSHING VALVE 3810

Minimum dynamic pressure for effective cleaning 1,5bar

3820 -3820B WC Control Plate

Compatible with Geberit Sigma UP320 e UP720

UP720 (SIGMA 8CM) Code 109.770.00.1 - SIGMA 8CM Code 109.790.00.1 - UP320 (SIGMA 12CM) Code 109.300.00.5 - 109.330.00.5 - COMBIFIX Code 110.770.00.1 – 110.358.00.5 - DUOFIX Code 111.726.00.1 – 111.300.00.5

NOTES TECHNIQUES D'INSTALLATION

MÉLANGEUR DE LAVABO 3 TROUS (3225/3226/3224P...)

Epaisseur de serrage maximum 45mm

INVERSEUR AUTOMATIQUE (3254MC...)

Inverseur automatique avec pression dynamique minimale 0,5 bar

MÉLANGEUR BAIN DOUCHE POUR INSTALLATION HORIZONTALE (3256, 3256TC, 3256TC308...)

Prevoir une trappe d'accès pour le remplacement éventuelle du flexible et composants

MÉLANGEUR DE LAVABO MURAL ENCASTRÉ (3229,3863,3861...)

Mélangeur de lavabo mural encastré avec pièces des raccordement non assemblées

TELETRON

Pour le bon fonctionnement du robinet électronique Teletron, il est essentiel d'utiliser le robinet d'arrêt / réglage / filtre fourni avec et utiliser batterie au lithium

ROBINET DE CHASSE À ENCASTRER 703-704

Le conduit d'alimentation doit avoir un diamètre correct par rapport à la taille du robinet choisie, il est recommandé que le diamètre du tube de descente soit de 26 mm

Pour un lavage efficace, il faut une pression dynamique minimum de 2,5 bar, la pression statique maximale de fermeture est de 3 bar

Montez un clapet ou un robinet de régulation avant le robinet de chasse. La courbe de la conduite de la paroi doit avoir une tendance douce pour faciliter le bon écoulement de l'eau, ne pas utiliser les coudes et les courbes de rayon court.

Évitez d'utiliser des courbes serrées ou à rayon réduit dans le conduit d'alimentation pour faciliter le bon écoulement de l'eau.

ROBINET DE CHASSE 3810

Pression dynamique minimale pour une chasse efficace 2,5 bar

3820 - 3820B PLAQUE

Compatible avec système Geberit Sigma UP320 et UP720

UP720 (SIGMA 8CM) Code 109.770.00.1 - SIGMA 8CM Code 109.790.00.1 - UP320 (SIGMA 12CM) Code 109.300.00.5 - 109.330.00.5 - COMBIFIX Code 110.770.00.1 – 110.358.00.5 - DUOFIX Code 111.726.00.1 – 111.300.00.5

AVVERTENZE

Le descrizioni e le illustrazioni dei nostri cataloghi, opuscoli e listini non comportano obbligo di fedele esecuzione.

Ci riserviamo il diritto di apportare, in qualsiasi momento, le modifiche tecniche e/o costruttive e/o dimensionali che riteniamo utili al miglioramento della nostra produzione. A difesa dei nostri diritti e a tutela dei Sigg. Clienti, ci riserviamo di procedere contro chiunque imiti servilmente i nostri prodotti o usi nomi o segni distintivi idonei a produrre confusione o comunque compia atti di concorrenza sleale nei nostri confronti, secondo quanto previsto dall'art. 2598 del Codice Civile.

Le rubinetterie e gli accessori da bagno prodotti dalla Stella sono realizzati in varie finiture e, in dipendenza da esse, si dovranno utilizzare prodotti differenti per la pulizia. Purtroppo sulle confezioni dei prodotti in commercio non sempre sono riportati tutti gli elementi, acidi o alcalini, contenuti e pertanto, in alcuni casi, l'uso di tali prodotti può arrecare gravi danni alle superfici metalliche.

Questi sono alcuni consigli da tener presente per la pulizia di rubinetti e accessori al fine di non causare eventuali danni irrimediabili alla superficie degli stessi.

AVVERTENZE PER LE CROMATURE

Stella realizza la sua cromatura dopo un trattamento preventivo che garantisce una finitura impeccabile, termine di paragone difficilmente eguagliabile. La cromatura è una delle finiture più resistenti alle azioni abrasive e/o chimiche di molti prodotti.

E' comunque buona norma non utilizzare prodotti in polvere o in pasta (quali Cif, Ajax, ecc...) che contengano granuli abrasivi. Inoltre la cromatura è estremamente sensibile, quasi esclusivamente, ai prodotti contenenti cloro o suoi composti. L'utilizzazione di questi prodotti causa, anche alla cromatura realizzata a regola d'arte, un'opacizzazione delle superfici con abbrunamento a macchie. In questo caso non è più possibile ripristinare la lucentezza originale.

AVVERTENZE PER LE NICHELATURE

La finitura nichel era utilizzata sulla rubinetteria, nei primi decenni del secolo passato, al posto della cromatura, non ancora adottata. Stella ha reintrodotta questa finitura con la riedizione della serie Italica, la prima serie completa di rubinetterie da bagno e cucina prodotta da Stella nei primi decenni del '900. Caratteristica della nichelatura è una progressiva opacizzazione uniforme della superficie che fa assumere agli oggetti l'aspetto tipico che avevano in quegli anni. Per far riassumere alla nichelatura la lucentezza originale, bisogna utilizzare prodotti specifici per la pulizia dei metalli (non per l'argento) quali Duraglit per metalli vari o Sidol (da passare molto leggermente). Questa finitura è estremamente sensibile, in particolare, all'ammoniaca e all'ipoclorito di sodio (candeggina) e ai prodotti o elementi che li contengono, sia sottoforma liquida sia di vapori. Le macchie che si formano a causa del contatto con questi prodotti, se intaccano profondamente le superfici, non sono più eliminabili. Per questa ragione è anche indispensabile posizionare articoli in finitura nichel lontano dal WC, soprattutto se vi è la presenza di bambini. E' altresì consigliabile tenere le superfici nichelate pulite da depositi calcarei. Gli elementi chimici che potrebbero esservi contenuti, seppure in basse concentrazioni, potrebbero causare, con l'andare del tempo, macchie non eliminabili.

AVVERTENZE PER LE FINITURE PVD

La finitura PVD (physical vapour deposition) è una speciale protezione con resistenza al sole, agli agenti chimici e allo sfregamento superiore anche al cromo. E' importante tuttavia che anche con riferimento a questa finitura non utilizzare prodotti in polvere o in pasta (quali Cif, Ajax, ecc...) che contengano granuli abrasivi.

Inoltre la finitura risulta essere estremamente sensibile, quasi esclusivamente, ai prodotti contenenti cloro o suoi composti. L'utilizzazione di questi prodotti causa, anche se il processo di protezione è realizzato a regola d'arte, un'opacizzazione delle superfici con abbrunamento a macchie. In questo caso non è più possibile ripristinare la lucentezza originale.

AVVERTENZE PER LA FINITURA BRONZO, BRONZO SCURO E NICHEL SPAZZOLATO

La finitura bronzo spazzolato è ottenuta mediante un processo di accelerazione dell'ossidazione, successivamente spazzolato e protetto con vernice trasparente. Per conservare il più a lungo possibile la protezione trasparente è necessario evitare di pulire il prodotto con detergenti acidi, abrasivi o comunque aggressivi per evitare l'essiccazione. Il nichel spazzolato come il nichel lucido è caratterizzato da una progressiva opacizzazione uniforme della superficie. Per far riassumere alla nichelatura la lucentezza originale, bisogna utilizzare prodotti specifici per la pulizia dei metalli (non per l'argento) quali Duraglit per metalli vari o Sidol (da passare molto leggermente). Questa finitura è estremamente sensibile, in particolare, all'ammoniaca e all'ipoclorito di sodio (candeggina) e ai prodotti o elementi che li contengono, sia sottoforma liquida sia di vapori. Le macchie che si formano a causa del contatto con questi prodotti, se intaccano profondamente le superfici, non sono più eliminabili. Per questa ragione è anche indispensabile posizionare articoli in finitura nichel lontano dal WC, soprattutto se vi è la presenza di bambini. E' altresì consigliabile tenere le superfici nichelate pulite da depositi calcarei. Gli elementi chimici che potrebbero esservi contenuti, seppure in basse concentrazioni, potrebbero causare, con l'andare del tempo, macchie non eliminabili.

AVVERTENZE PER LA FINITURA ARGENTO

La finitura Argento è costituita da un deposito di ben 10 micron d'argento. Per la sua pulizia si utilizzano gli stessi prodotti utilizzati per l'argenteria di casa o, in alternativa, ammoniaca o alcool leggermente diluiti.

Un prodotto in commercio utilizzabile per la pulizia dell'argento, con cautela e senza troppa insistenza in quanto avente anche azione abrasiva, è il CIF Ammoniacal liquido (flacone bianco).

L'argento è estremamente sensibile alla candeggina e agli elementi contenuti nei profumi che possono corrodere profondamente la superficie creando un danno difficilmente rimediabile.

AVVERTENZE PER LA FINITURA ORO, ORO ROSA E ORO INGLESE SPAZZOLATO

La finitura Oro è ottenuta mediante doratura a 23,5 Kt, con uno spessore medio di circa 1,5 micron. La finitura Oro rosa è ottenuta mediante doratura a 14 Kt; quelle in oro inglese spazzolato 18 Kt. Sono realizzate nel nostro stabilimento con controllo costante dello spessore e della qualità del prodotto. L'oro è insensibile alla maggior parte degli acidi e pertanto è molto difficile che si deteriori per ragioni chimiche. L'elevatissimo spessore della nostra doratura dovrebbe garantire anche una lunghissima durata. Comunque è buona norma non utilizzare prodotti abrasivi per la sua pulizia.

DIRECTIONS

The descriptions and illustrations in our catalogues, brochures and price lists do not imply that the manufactured products will be identical.

We reserve the right to make any technical, structural or dimensional improvements at any time to any product, without prior warning. To defend our rights and to safeguard our customers, we also reserve the right to take action against any party that might slavishly imitate our products or use names or distinctive signs to create confusion or that, in any way, might commit acts of unfair competition against us, in accordance with Art. 2598 of the Italian Civil Code. The taps and accessories manufactured by Stella are delivered in a number of different finishes. The type of product used for cleaning depends on the type of finish. Unfortunately, not all cleaning products on sale clearly indicate their acid or alkaline content and some of them may cause harm to metallic surfaces. Below, some advice is given on how to clean taps and accessories and ensure that no irremediable damage is caused.

DIRECTIONS FOR CHROME-PLATED SURFACES

Stella chrome-plating is formed over a treatment which guarantees an impeccable finish of touchstone quality that is virtually unparalleled.

Chrome-plating is one of the most resistant finishes to the abrasive and chemical actions of many products. Even so, it is better never to use any powder or paste products (such as Cif, Ajax, etc.) that contain abrasive granules. Chrome plating is extremely sensitive almost only to products that contain chlorine or its compounds. The use of these products tarnishes even the finest chrome plating, causing darkening and stains. Once this occurs, it is impossible to restore the original lustre.

DIRECTIONS FOR NICKEL-PLATED SURFACES

Nickel-plating was used for taps in the early 20th century, before chrome plating was introduced. Stella has reintroduced this type of finish for the revival of the Italice collection, the first complete range of bathroom and kitchen taps manufactured by Stella in the early years of the 20th century. The gradual and uniform opacification of the surface is a characteristic of nickel-plated and it is this that gives objects made in those years their typical look. To restore the original lustre of nickel-plated surfaces, special products for polishing metal (not silver), such as Duraglit for metal or Sidol should be used (very sparingly). This finish is particularly sensitive to ammonia and sodium hypochlorite (bleach) and to any products and elements that contain these substances, whether in liquid or vapour form.

Resistance transparent kiln-fired varnish is applied as protection. In order to maintain its shiny, brilliant appearance, the transparent varnish must not be damaged by abrasive products. For this reason, only neutral, liquid products that are totally free of abrasive powder or paste should be used.

DIRECTIONS FOR PVD FINISHES

The PVD finish is a special protection with resistance to salt, chemical agents and friction with properties superior even to those of chrome. It is nonetheless important that powder-based/abrasive products are not used on this finish (such as Cif, Ajax, etc.)

PVD plating is extremely sensitive almost only to products that contain chlorine or its compounds. The use of these products tarnishes even the finest plating, causing darkening and stains. Once this occurs, it is impossible to restore the original lustre.

DIRECTIONS FOR BRONZE, BLACK BRONZE AND MATT NICKEL

The brushed bronze finish is created via a process of catalysed oxidation, subsequently brushed and protected with a transparent varnish. In order to preserve the transparent protection for as long as possible, it is necessary to avoid cleaning the product with detergents which are either acidic, abrasive or aggressive. Both matt nickel and polished nickel are characterised by a gradual tarnishing of the top surface.

To restore the original lustre of nickel surfaces, special products for polishing metal (not silver), such as Duraglit for metal or Sidol should be used (very sparingly). This finish is particularly sensitive to ammonia and sodium hypochlorite (bleach) and to any products and elements that contain these substances, whether in liquid or vapour form resistance transparent kiln-fired varnish is applied as protection. In order to maintain its shiny, brilliant appearance, the transparent varnish must not be damaged by abrasive products. For this reason, only neutral, liquid products that are totally free of abrasive powder or paste should be used.

DIRECTIONS FOR SILVER-PLATED SURFACES

The silver finish, consists of a silver deposit of no less than 10 microns. The same products used for polishing domestic silverware can be used. Slightly diluted ammonia or alcohol can also be used as an alternative. One product that can be used for polishing silverware is CIF Ammoniacal (sold as a liquid in a white bottle), though it must be used sparingly since it has some abrasive properties. Silver is extremely sensitive to bleach and to elements in perfumes that can deeply corrode the surface creating damage that is hard to remedy.

DIRECTIONS FOR GOLD, ENGLISH MATT GOLD AND ROSE GOLD PLATED SURFACES

The gold finish consists of 23.5Kt gold plating. The average thickness is about 1.5 microns. Rose gold consists of 14 Kt plating, while English matt gold consist of 18 Kt plating. Finish is applied in our factory and is subjected to constant thickness and quality controls. Gold is immune to most acids and thus is unlikely to deteriorate due to chemical reasons. The extremely great thickness of our gold plate should also ensure a very long working life. Even so, it is wise not to use any abrasive products for cleaning.

INSTRUCTIONS D'ENTRETIEN

Les descriptions et les illustrations de nos catalogues, documents et tarifs sont données à titre indicatif, et ne représentent en aucun cas un engagement de notre part. Nous nous réservons le droit d'apporter, sans avis préalable, toutes modifications techniques qui nous sembleraient utiles à l'amélioration de notre production. Pour la défense de nos droits et de ceux de nos clients, nous nous réservons la possibilité d'assigner quiconque imiterait servilement nos produits, nos marques, ou nos signes distinctifs dans le but de produire une confusion ou un acte de concurrence déloyale à notre égard, en application de l'article 2 598 du code civil italien.

INSTRUCTIONS D'ENTRETIEN

Les robinetteries et les accessoires produits par Stella, sont proposés dans différentes finitions. Les produits d'entretien devront donc être appropriés à chacune de ces finitions. Malheureusement, la composition des produits du commerce n'est pas toujours indiquée sur les flacons, et la présence d'éléments acides ou alcalins peut causer de graves dommages aux revêtements des surfaces. C'est pourquoi, pour entretenir au mieux vos robinetteries et vos accessoires, vous trouverez ci-dessous quelques conseils qui vous permettront de conserver longtemps la qualité et l'éclat des produits Stella.

POUR LE CHROME

Stella réalise son chrome sur une couche préalable de nickel à forte épaisseur. C'est le secret d'une finition impeccable, et d'une qualité difficilement comparable. Le chrome est une des finitions les plus résistantes aux actions abrasives ou chimiques des produits d'entretien. Il est toutefois recommandé de ne pas utiliser ce type de produits, que l'on trouve sous forme de poudre ou de pâte (Cif, Ajax, etc.).

Le chrome est, par contre, extrêmement sensible aux produits à base de chlore ou dérivés, et l'utilisation de ces produits entraîne, même sur du chrome réalisé dans les règles de l'art, une opacification de la surface et l'apparition de tâches. Dans ce cas il n'est plus possible de récupérer l'état de surface initial.

POUR LE NICKEL

Au début du siècle passé, les robinetteries étaient uniquement recouvertes d'une couche de nickel, sans application complémentaire de chrome, comme cela se fait aujourd'hui. Stella a réintroduit cette finition avec la rediffusion de la série Italica, première série complète de robinetterie produite par Stella au début des années 1900. Une des caractéristiques du nickel, quand on ne le nettoie pas régulièrement, est de présenter une oxydation progressive et uniforme de la surface, qui donne un aspect typique des objets de cette époque. Pour redonner le brillant d'origine, il faut utiliser des produits de nettoyage type Mirror ou équivalent. Il ne faut pas utiliser de produits destinés à l'argenterie.

Le nickel est extrêmement sensible à l'ammoniaque ou à l'eau de Javel, et à tous les produits dérivés, que ce soit sous forme liquide, ou sous forme vapeur. Les tâches qui se forment au contact de ces produits s'incrusteront profondément dans le revêtement, et ne peuvent plus s'éliminer. C'est une des raisons pour laquelle il est nécessaire de ne pas positionner les articles en finition nickel trop près de la cuvette des WC, surtout lorsqu'ils sont utilisés par de jeunes enfants. Il est également conseillé de ne pas laisser se former de dépôts calcaires sur les surfaces nickelées. Les éléments chimiques qu'ils pourraient contenir, même en faible concentration, risqueraient de former, avec le temps, des tâches définitives.

POUR TOUTES LES FINITIONS PVD

La finition PVD est un revêtement spécial insensible aux brouillards salins, aux produits chimiques et aux frottements avec une résistance supérieure au chrome. Il est toutefois recommandé de ne pas utiliser ce type de produits, que l'on trouve sous forme de poudre ou de pâte (Cif, Ajax, etc.).

POUR BRONZE, BRONZE NOIR ET NICKEL MAT

La finition bronze mat est obtenue par un procédé d'accélération de l'oxydation puis brossée et protégée par un vernis transparent. Afin de préserver le plus longtemps possible son éclat, il est nécessaire d'éviter de nettoyer avec des produits acides, abrasifs ou agressifs.

Le Nickel mat semblable au nickel poli se caractérise par une opacification progressive de la surface. Le nickel est extrêmement sensible à l'ammoniaque ou à l'eau de Javel, et à tous les produits dérivés, que ce soit sous forme liquide ou sous forme vapeur. Les tâches qui se forment au contact de ces produits s'incrusteront profondément dans le revêtement, et ne peuvent plus s'éliminer.

POUR L'ARGENT

La finition Argent est constituée d'un dépôt moyen d'environ 10 microns d'argent pur. Pour son entretien, on utilise les mêmes produits que pour l'argenterie classique, en alternance avec de l'ammoniaque ou de l'alcool légèrement dilué. Parmi les produits du commerce, vous pouvez utiliser avec précaution, compte tenu de son action abrasive, du "CIF ammoniaque liquide" (flacon blanc). L'argent est très sensible à l'eau de Javel et aux éléments contenus dans les parfums qui peuvent détériorer le revêtement en profondeur créant des dommages difficilement récupérables.

POUR L'OR, OR ROSE OR ANGLAIS MAT

La finition or est une dorure à 23.5 Kt, avec une épaisseur moyenne d'environ 1.5 micron. La finition or rose est une dorure à 14 Kt et l'or anglais mat de 18 Kt. Elles sont réalisées à l'usine avec un contrôle constant des épaisseurs et de la qualité du produit. L'or est insensible à la plupart des produits acides et difficilement attaqué par des agents chimiques. L'épaisseur très élevée de notre dorure garantit la tenue de ce revêtement pour une durée très longue.

Toutefois, il est préférable de ne pas utiliser de produits abrasifs pour son entretien.

CONDIZIONI GENERALI DI VENDITA

La vendita dei prodotti Stella è soggetta alle seguenti condizioni di vendita, che sostituiscono tutte le precedenti condizioni di vendita. Senza autorizzazione scritta di Rubinetterie Stella S.p.A., l'acquirente non può imporre le proprie condizioni di acquisto, qualora fosse in conflitto con le presenti Condizioni Generali di Vendita. Rubinetterie Stella S.p.A. si riserva il diritto di modificare e / o variare le presenti Condizioni Generali di Vendita, allegando tali modifiche o variazioni a tutti i preventivi e all'eventuale corrispondenza scritta inviata all'Acquirente.

PREZZI

I prezzi si intendono in Euro, IVA esclusa, per merce franco Novara.

ORDINI

Gli ordini conferitici direttamente o per tramite di nostri rappresentanti o agenti s'intendono accettati salvo comunicazione contraria. Le illustrazioni dei cataloghi non comportano obbligo di fedele esecuzione degli articoli. Ci riserviamo il diritto di sopprimere, anche senza preavviso, qualsiasi articolo dai nostri cataloghi e di apportare qualsiasi modifica ritenuta utile o necessaria per il miglioramento della nostra produzione.

PAGAMENTI

I pagamenti devono essere effettuati al nostro domicilio giuste le condizioni stabilite e trascritte in fattura. Inoltre, relativamente ai ritardi ed agli interessi di mora, ci atterremo a quanto previsto dal D.Lgs. n°231 del 9 ottobre 2002, attuativo della direttiva comunitaria 2000/35/CE.

SPEDIZIONI

La merce viaggia a rischio e pericolo del committente anche se venduta franco destinazione.

CONSEGNE

I termini stabiliti e accettati s'intendono sempre approssimativi e non assumiamo responsabilità di sorta per eventuali ritardi.

RESI PER ERRATA ORDINAZIONE

Richieste di reso per errata ordinazione possono essere da noi eventualmente accettate se inoltrate a mezzo lettera o fax entro 30 giorni dal ricevimento della merce. La presentazione della richiesta di reso non deve dar luogo alla sospensione del pagamento o a un pagamento parziale o ritardato della merce ricevuta. La merce resa verrà accreditata con la trattenuta, da parte nostra, del 15% del valore fatturato (importo minimo 20,00 euro) per spese di controllo, riconfezionamento ed amministrative. Il reso dovrà essere effettuato con spedizione della merce in porto franco al nostro stabilimento.

GENERAL CONDITIONS OF SALE

The sale of Stella products is subject to the following conditions of sale, which substitute all previous conditions of sale. Without written authorisation from Rubinetterie Stella S.p.A., purchasers may not impose their conditions of purchase, should they be in conflict with the present General Conditions of Sale. Rubinetterie Stella S.p.A. reserves the right to modify and/or vary the present General Conditions of Sale, enclosing such modifications or variations with all quotations and any written correspondence sent to the Purchaser.

PRICES

Prices are indicated in euros, net of customs charges, duties, VAT and taxes of any kind.

ORDERS

Orders delivered directly to us or through our sales network are to be considered as accepted except contrary communications. All the information in this price list is purely indicative and is in no way binding for Rubinetterie Stella S.p.A. The illustrations in the catalogues entail no obligation to manufacture the articles accordingly. We reserve the right to withdraw, even without prior warning, any article from our catalogues and to make any modification considered to be useful or necessary to improve our products.

PAYMENT

Payment shall be made to our registered address in accordance with the terms and conditions indicated in the invoice. In the case of delayed payment and interest on arrears, the terms of D.Lgs. no. 231 of 9 October 2002, implementing EU directive 2000/35/E shall be applied.

DELIVERIES

Unless otherwise stipulated by the parties, delivery of the products shall be considered as EXW (Incoterms 2000) from the Rubinetterie Stella S.p.A. factory in Italy. Rubinetterie Stella S.p.A. undertakes to deliver the products within the time that may be agreed upon, but in no case shall it be held responsible for any damages directly or indirectly caused by a delay in the delivery of the products.

RESERVATION OF TITLE

The transfer of ownership shall be effective only upon full payment of the products purchased. We reserve the right to reclaim, entirely or in part, any delivered products covered by invoices not paid in full.

RETURNS DUE TO ERRONEOUS ORDERING

We may accept applications for the return of products due to erroneous ordering, if such applications are sent by letter or fax within 30 days of receipt of the goods. The presentation of the application for return of goods must not give rise to suspension of payment, or to partial or delayed payment of the goods received. The returned goods will be credited subject to the retention by us of 15% of the amount invoiced (minimum 20.00) to cover inspection, repackaging and administrative costs. The return shall be effected by delivery of the goods, carriage paid, to Italy.

CONDITIONS GÉNÉRALES DE VENTE

La vente des produits Stella est soumise aux conditions de vente suivantes, qui se substituent à toutes les conditions de vente précédentes.

Sans l'autorisation écrite de Rubinetteria Stella S.p.A., les acheteurs ne peuvent pas imposer leurs conditions d'achat, en cas de conflit avec les présentes Conditions Générales de Vente. Rubinetteria Stella S.p.A. se réserve le droit de modifier et / ou faire changer les présentes Conditions Générales de Vente, en écrivant ces modifications ou variations sur tous les devis et à toute correspondance écrite envoyée à l'acheteur.

PRIX

Les prix s'entendent hors TVA, en Euro, franco départ Novara.

COMMANDES

Les commandes reçues directement par nos représentants ou agents sont acceptées sauf accord contraire.

Les illustrations des catalogues ne comportent pas l'obligation de l'exécution fidèle des articles. Nous nous réservons le droit de supprimer, même sans préavis, tout élément de nos catalogues et de faire toutes modifications jugées nécessaires à l'amélioration de notre production.

PAIEMENT

Toutes les factures sont payables à notre siège suivant les conditions générales de vente énoncées sur les factures. Concernant les retards et intérêts moratoires, nous respectons les dispositions du décret législatif n° 231 du 9 octobre 2002 de la directive européenne 200/35/CE.

EXPEDITION

Les marchandises voyagent aux risques et périls de l'acheteur même si elles sont vendues franco destination.

LIVRAISON

Bien que nous nous efforcions de respecter au maximum les délais indiqués, un retard dans la livraison ne peut en aucun cas entraîner de notre part une quelconque indemnité.

RETOUR POUR ERREUR DE COMMANDE

Les demandes de retour pour erreur de commande ne peuvent être acceptées qu'avec envoi par lettre ou par fax dans un délai de 30 jours suivant la réception de la marchandise.

La demande de retour ne peut suspendre le paiement ou le règlement partiel ou retard de la facture.

NOTA : Les conditions générales de vente indiquées ci-dessus se rapportent à toutes livraisons et facturations effectuées par STELLA. Dans le cas de livraison et facturation directe par DISTEL, les conditions générales de vente sont celles indiquées sur la « confirmation de commande » remise au client

GARANZIA

Tutti i nostri prodotti sono realizzati "a regola d'arte" e sono sottoposti a scrupolosissimi controlli durante ogni fase del processo produttivo e la proverbiale robustezza ed affidabilità che li caratterizza ci consentono di accordare un garanzia, a valere dalla data d'installazione:

illimitata: su tutti i corpi da incasso in bronzo (esclusi vitoni e cartucce)

di 5 anni: su tutta la nostra produzione in finitura cromo e PVD e sugli elementi non superficiali delle rubinetterie in altra finitura (esclusa componentistica relativa alla garanzia dei 2 anni, vedi voce seguente)

di 2 anni: sulle parti in vista delle serie in finitura Nichel, Nichel Spazzolato, Bronzo, Bronzo Scuro, Argento, Oro, Oro Rosa, Oro Inglese Spazzolato e Nero; su cartucce di miscelazione e termostatiche, vitoni ceramici e sulle parti elettriche ed elettroniche.

In applicazione della normativa europea, recepita da apposita legge italiana, la garanzia copre ogni difetto di fabbricazione (difetti di fusione, di lavorazione meccanica e di finitura) previo controllo del pezzo difettoso da parte del ns. Ufficio Tecnico.

La garanzia non copre il materiale che presenti le seguenti situazioni:

Normale usura o danni causati da un eccesso di calcare nell'acqua (guarnizioni, rompighetti, fondelli di soffioni, ecc.) o dal gelo.

Deterioramento delle superfici dovuto a utilizzazione di prodotti per la pulizia non idonei o a pulizia delle superfici effettuata in modo non corretto e senza tener conto delle nostre istruzioni

Deterioramento causato da installazione non corretta

Anomala utilizzazione della rubinetteria

Riparazioni e/o manutenzioni mal effettuate e/o utilizzazione di ricambi inadatti o non originali Stella

La garanzia si limita alla riparazione o alla sostituzione dei pezzi difettosi, da effettuarsi nel nostro stabilimento o nei centri di assistenza da noi autorizzati, e non copre i costi di smontaggio, rimontaggio né gli eventuali danni ai rivestimenti o ai sanitari.

Reclami

Eventuali reclami di qualsiasi genere devono pervenire per lettera raccomandata entro otto giorni dall'arrivo a destinazione della merce.

Contestazioni

Per ogni contestazione è riconosciuta la sola competenza del Foro di Novara.

WARRANTY

All other products are superbly crafted and are subject to the most stringent tests in each stage of the production process: their celebrated sturdiness and reliability means that we are able to cover them with the following warranties as from the date of installation:

unlimited on all recessed units in bronze (excluding headworks and cartridges)

- 5 year: on all chrome-plated and PVD products and all non-surface elements of taps with other finishes (excluding components related to the guarantee of two years, see next item)

- 2 year: on exposed parts on nickel, matt nickel, bronze, dark bronze, silver, rose gold, English matt gold, gold and black finishes, for cartridges (mechanical and thermostatic), ceramic headworks, and electrical and electronic components

In accordance with European regulations, implemented by a special Italian law, the warranty covers any manufacturing defects (casting defects, mechanical processing and finishing), subject to inspection of the defective part by our Engineering Department.

The warranty does not cover materials in the following conditions:

Normal wear or damage caused by excessive limestone in the water (washers, aerators, showerhead plates, etc.) or freezing.

Deterioration of surfaces due to the use of unsuitable cleaning products or cleaning of the surfaces carried out incorrectly and not in accordance with our instructions.

Deterioration caused by incorrect installation

Anomalous use of the taps

Repairs and/or maintenance carried out incorrectly and/or with the use of unsuitable or non-original spare parts

The warranty covers only the repair or replacement of the defective part, to be carried out in our factory or in technical assistance centres authorised by Stella. It does not cover the costs of disassembly, reinstallation or any damage caused to surface materials or to sanitary fittings.

COMPLAINTS

Any complaint of any kind must be sent by registered letter within eight days of the arrival of the goods at destination. Should no complaint be made before such time, the products will be considered to have been accepted by the Purchaser.

REGULATIONS

Most of our products are made in compliance with those European Union (EU) regulations that may be applicable to them. Except in the case of an explicit declaration by Rubinetterie Stella S.p.A., no guarantee is issued concerning compliance of the products with national rules and regulations – expressly including safety and accident-prevention standards in force in the country of the Purchaser – should the latter be the resident outside the EU or, more in general, in any nation that is not a member of the EU.

GARANTIE

Tous nos produits sont fabriqués suivant les « règles de l'art » et sont soumis à des contrôles rigoureux lors de chaque phase du processus de production. La solidité légendaire et la fiabilité qui les caractérisent nous permettent de donner une garantie applicable à partir de la date d'installation :

-Illimitée : sur tous les corps encastrés en bronze (sauf les têtes et les cartouches)

- 5 ans : sur l'ensemble de notre production en finition Chrome et PVD et sur les éléments non apparents des autres finitions

- 2 ans : sur les parties apparentes des séries en finition Nickel, Nickel Mat, Bronze, Bronze noir, Argent, Or rose, Or, Or Anglais Mat et Noir; composants électriques et électroniques, sur les cartouches (mécaniques et thermostatiques) et les têtes céramiques.

Conformément à la législation européenne, cette garantie couvre tous les défauts de fabrication (défaut de moulage, usinage et finition) après vérification de notre département technique.

La garantie ne couvre pas le matériel dans les situations suivantes :

-Usure normale ou dommages causés par un excès de calcaire dans l'eau en particulier pour les joints, aérateurs, grilles de pomme de douche, etc... ou pour cause de gel

-Dégradation des surfaces due à l'utilisation de produits de nettoyage inappropriés ou nettoyage des surfaces fait de manière incorrecte et sans tenir compte de nos instructions

-Détérioration causée par une mauvaise installation

-Utilisation anormale des robinets

-Réparation, mauvaise manutention ou utilisation de pièces détachées inadaptées ou n'étant pas d'origine STELLA

La garantie se limite à la réparation ou au remplacement en nos ateliers du matériel reconnu défectueux. Elle ne couvre pas les frais de démontage, de remontage ni d'éventuels dommages et intérêts pour privation de jouissance.

RECLAMATION

Toute réclamation à quelque titre que ce soit devra faire l'objet d'une lettre recommandée à notre siège dans un délai maximum de 8 jours suivant la réception des marchandises.

CONTESTATION

Toute contestation relève exclusivement de la compétence du Tribunal de Commerce de la Cour de Novara (Italie).
